#### **Review Summary**

The Smarter Money Long-Short Credit Fund (the Fund) is an absolute return, fixed-income strategy. The investment manager, Coolabah Capital Investments (CCI), aims to generate 'excess returns' by taking a 'long' and/or 'short' position in mispriced fixed income securities. Since inception, the manager has made a limited use of shorting, relying on leveraging the investments strategy implemented in the Smarter Money High Income fund. Key differentiators of CCI's approach are:

- The strategy is very active and opportunistic; it is designed to exploit bond valuation mispricing rather than interest rate duration, credit, or illiquidity beta. Typically, the fund has very low interest rate risk, it has investment grade credit risk and high levels of liquidity.
- The combination of top-down and bottom-up quantitative, fundamental, and technical analysis enables the manager to generate differentiated insights about the market in which it operates. These insights afford the manager the ability to adapt to market conditions and position the portfolio accordingly.
- Relatively large investment team, with significant resources devoted to price discovery.

The market turmoil caused by COVID-19 is likely to create considerable challenges as well as some opportunities for all investors over the next 6-12 months. We believe that CCI is in a relatively strong position to weather these challenges and take advantage of the opportunities, mainly due to their nimble strategy and the quality and liquidity of their portfolio. Nonetheless, investors should be prepared for a more volatile pattern of returns and accept a potentially extended time horizon for achievement of the strategy's return objective.

#### **Investment Rating & Product Complexity Indicator**

A **VERY STRONG** rating indicates a very strong conviction that the Fund can deliver a risk adjusted return in line with manager's objective. The rating has been influenced by the early stage of the Smarter Money Long-Short Credit Fund.

Designation as a **MORE COMPLEX** financial product indicates that the Fund generates returns through a variety of non-standard investment strategies. Products of this type are often known as Hedge Funds. The strategies used include the use of leverage, the ability to go both long and short, investment in sub-investment grade securities and the use of over-the-counter credit derivatives.

### Fund Details

Fund name	Smarter Money Long Short Credit Fund	
Dominant Strategy	An absolute return fixed income strategy focused on exploiting long and short mispricing in credit markets.	
Fund Type	Hedge Fund/Alternative Asset: Long/Short Australian fixed interest	
Investment Manager	Smarter Money Investments Pty Ltd	
Sub-Investment Manager	Coolabah Capital Institutional Investments Pty Ltd	
Trustee/RE	Equity Trustees Limited	
KEY FEATURES		
Fund inception	31 August 2017	
Domicile	Sydney, Australia	
Legal Form	Registered Open-ended Australian Unit Trust	
APIR Codes	Platform/Direct: SLT2562AU, Institutional Class: SLT3458AU	
Geographic Mandate	Global credit with a focus on Australian issuers	
Open	Yes	
Management and Administration Fee	0.75% p.a. investment management fee plus 0.25% p.a. administration fee (Direct Investor class)	
Performance Fee	20.5% (excl GST) p.a. of the amount by which the fund's return on its investments (before fees and taxation) exceeds the performance hurdle. Calculated daily and paid semi-annually in arrears.	
High Water Mark	Cumulative return (above the RBA Cash Rate, gross of fees, incl. distributions and before performance fees). No performance fees are payable until any accrued underperformance (in dollar terms) from prior periods has been made up.	
Distributions	Quarterly 30 June, 30 September, 31 December, 31 March	
FUM	A\$379.7 million as at 29 February 2020	
Minimum Subscription	A\$1,000	
Subsequent Subscription	A\$1,000 (or \$100 per month for a regular savings plan)	
Entry Fee	No	
Exit Fee	0.10% exit spread paid to unitholders in the trust	
Fund Term	Open-ended	
Reporting	Online 24/7, monthly reports, quarterly/annual distribution and tax statements.

Australia Ratings

### Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### **Investment Profile**

#### BACKGROUND

Equity Trustees Limited (EQT) is the Responsible Entity (RE) of the Smarter Money Long Short Credit Fund, established in 2017. EQT has appointed Smarter Money Investments Pty Ltd (SMI), a Sydney-based cash and fixed interest manager, as the Investment Manager. SMI in turn outsources all funds management responsibility to Coolabah Capital Institutional Investments Pty Ltd (CCI) via a sub-investment management agreement.

SMI was established to offer investors fixed income products characterised by a low volatility risk profile. Until July 2019, SMI was equally owned by CCI (50%) and its retail distribution partner Yellow Brick Road Holdings Ltd (YBR), an ASX listed company. YBR was responsible for funding the costs of SMI's retail distribution requirements. The initial offer was the Smarter Money Fund which was launched in February 2012. This was followed by the launch of the Smarter Money High Income Strategy Fund in September 2014. The Smarter Money Long-Short Credit Fund was the third fund, launched by SMI in 2017.

In July 2019, CCI bought out the 50% YBR stake and made some changes to the distribution channel. Another ownership change took place at the end of 2019. The 25% stake in CCI owned by AMB Holdings was sold to Pinnacle Investment Management (ASX:PNI), a sizeable investment management organisation with around \$60bn in assets under management (AUM) and small overseas presence. The CCI team continues to own 75% of CCI shares, as has been the case since inception. As a result of this transaction, a number of changes to the distribution partners line up occurred with Pinnacle now being largely responsible for distribution of CCI's funds and capabilities. Given its strong distribution and complementary investment management capabilities, the new shareholder should be a suitable partner in supporting CCI's ambition to grow and expand internationally.

CCI has invested approximately \$10-20m of its own capital into its strategies, which provides for strong alignment of interests. Profits have been re-invested in the business, mainly in additional staff, systems, and technology.

CCI is intending to open a London office in July of this year, initially for trading. The manager has a strong desire and intention to grow and expand overseas and believes that its overall AUM capacity across all the strategies is between \$15bn to \$20bn. Pinnacle, which has offices in London and NY, is expected to lead charge in CCI's planned overseas expansion and is tasked with exploring the best investment structures for offering the manager's capabilities in overseas markets. According to Chris Joye, the founder of the business and the CIO, the focus of the business over the next 6-to-12 months will be consolidation; i.e., the manager is unlikely to make a lot of changes.

The table below summarises the existing funds/product mix with total AUM in 2019 and February 2020. There has been a decline in the Fund's inflow which according to the manager are mainly a result of weaker adviser inflows.

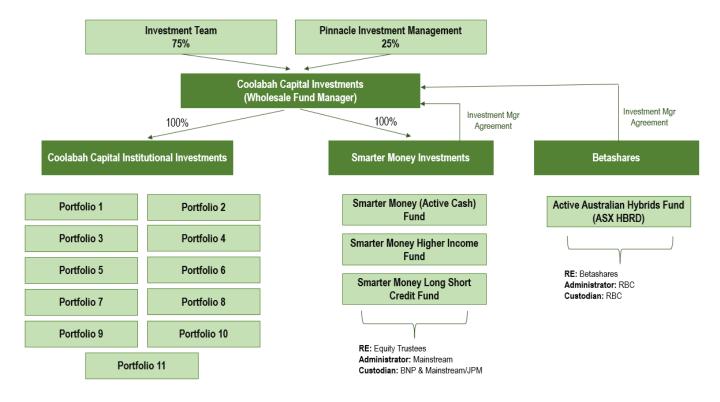

TOLAI FUM		
Strategy /Funds	\$ January 2019	\$ February 2020
Smarter Money Fund	\$647.39 m	\$648.38 m
Smarter Money Higher Income Fund	\$390.75 m	\$397.91 m
Smarter Money Long Short Credit	\$342.10 m	\$377.53 m
Fund		
Coolabah Institutional Cash Plus	\$129.20 m	\$129.17 m
Fund		
Coolabah Institutional Active Credit	\$328.22 m	\$327.61 m
Fund		
BetaShares Active Australian	\$688.51 m	\$692.99 m
Hybrids Fund		
Mandates	\$631.86 m across 7 mandates	\$806.92 m across 9 mandates
Total	\$3,158 m	\$3,381 m

#### Total FUM

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### Fund Management Structure

Given its strong distribution and complementary investment management capabilities the new shareholder should be a suitable partner in supporting CCI's ambition to grow and expand internationally.

#### OBJECTIVE

The Smarter Money Long-Short Credit Fund is an absolute return fixed-income strategy targeting mid-to-high single digit returns through actively exploiting mis-pricings in credit markets. CCI aims to create alpha by taking a 'long' and/or 'short' position in relation to assets that it considers are trading below or above fair value and by using leverage.

The targeted return for this Fund is 4-6% p.a. above the RBA cash rate, which currently translates to around 4-6% p.a. after all fees. The official objective is to achieve these returns with less than 5% p.a. volatility over rolling three-year periods. The investment team believes that actual realised volatility will be lower at less than 3% p.a..

#### FUNDS UNDER MANAGEMENT

The Smarter Money Long Short Credit Fund was launched in September 2017 with internal seed capital of approximately \$15m and has since grown to approximately \$380m.

As of March 2020, CCI manages approximately \$3.4billion (\$4.5bn including leverage) in Australian active cash and credit strategies for a predominantly institutional client base (70%). There are around 15 portfolios including the five funds and separately managed mandates. In addition, CCI manages BetaShares Active Australian Hybrids Fund ETF. However, according to the manager, all the strategies use the same underlying 'alpha' engine, with each strategy's portfolio being driven by its specific risk parameters.

#### INVESTMENT UNIVERSE

CCI invests in the Australian cash credit/fixed-income sector, which encompasses Australian-issued government and semigovernment bonds, Australian-issued corporate and financial bonds, and the cash securities market.

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### The Fund can invest in:

Physical assets denominated in AUD (hedged or issued in AUD)	Derivatives
cash, TDs and cash equivalents	interest rate derivatives
senior and subordinated debt securities	credit derivatives such as credit default swaps
hybrid securities	foreign exchange derivatives
<ul> <li>asset-backed securities (ABS)</li> </ul>	other related swaps and repurchase agreements
<ul> <li>residential mortgage-backed securities (RMBS)</li> </ul>	
ASX listed AUD ADI deposit ETFs	
sub-investment grade bonds	
<ul> <li>foreign denominated debt (issued by Australian and Non- Australian incorporated companies)</li> </ul>	

Derivatives are used to take investment positions and hedge interest rate, credit and macro-economic risks. The Fund's strategy permits the use of leverage to seek further enhanced returns attributable to these mis-pricings and/or situations where the interest or income earned on the assets is higher than the cost of the leverage. The Portfolio Manager seeks to exploit mispriced investments by taking a 'long' position or a 'short' position, either directly or through using derivatives.

The objective is to invest in relatively low risk and liquid investments, primarily senior and subordinated debt securities, hybrids and derivatives issued by Australian entities domestically and overseas, with the majority of the portfolio in investment-grade quality debt securities and hybrids. While not strictly reinforced through the strategy's risk management limits, the manager has a bias towards oligopolies and monopolies aiming to exploit the explicit or implicit government guarantees.

#### **Investment Philosophy**

The manager's philosophy is grounded in active management and the belief that a detailed, research-driven approach in selecting and managing Australian fixed interest securities can generate alpha. In addition, CCI believes that dynamic portfolio weighting between cash and credit, using a bottom-up and top-down valuation framework, can add considerable value and reduce volatility risk.

Specifically, the manager cites the following characteristics of the domestic fixed income market that create opportunities to add value though an active approach:

- The Australian fixed interest market is highly inefficient as most Australian investment-grade fixed-income is traded over the counter; hence there is no mandated price discovery/disclosure through Austraclear. This results in highly opaque/inefficient asset pricing, which is compounded by a large number of 'passive' fixed-income styles in the market.
- In their view, even most 'active' fixed-income managers are very passive; 'buy-and-hold' investors focused on 'yield' and neglecting 'total returns' with inadequate emphasis being placed on top-down/bottom-up valuation models.
- CCI believes that exposure to long-term interest rate duration risk is the biggest source of capital risk in fixed-income.
   They don't think that anyone can forecast GDP growth or interest rate changes beyond 6-12 months.

#### Investment Strategy

The investment strategy for the Smarter Money Long-Short Credit Fund builds on, and is completely consistent with, CCI's tested Active Cash and Higher Income strategies. In the Smarter Money Long-Short Credit Fund, the active management is enhanced with an extended investment universe, an ability to go long and short, and leverage at a portfolio level. However, according to manager, since inception, they have made a limited use of shorting, relying on leveraging the investments strategy implemented in the Smarter Money High Income fund.

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

CCI differentiates itself from typical fixed interest strategies such as index management and buy-and-hold by being active and opportunistic across the whole portfolio; i.e., security selection and asset allocation. It is designed to exploit bond valuation mispricing rather than interest rate duration, credit or Illiquidity beta. Typically, the fund has very low interest rate risk, it has investment grade credit risk and high levels of liquidity.

CCI aims to generate risk-adjusted returns predominantly through identifying mispriced bonds (predominantly floating) and hybrids. They value securities on a bottom-up and top-down basis using a mix of quantitative and qualitative models and technical analyses to find assets that are mispriced and which can deliver capital gains when they normalise or mean-revert over and above their yield. The manager has a total return focus which means it won't hold over-valued assets for sake of income.

Common strategies across all Funds	Fund	Target Return (p.a.)	Volatility Limit (p.a.)	Additional strategies
Active Cash <ul> <li>securing best ADI deposit rates</li> <li>diversification of providers</li> </ul>	Active Cash	RBA cash + 1% to 2%	<1%	Invests in Australian cash and IG credit only. No Tier 1 hybrids permitted.
<ul> <li>diversincation of providers</li> <li>short term duration macro calls</li> <li>Active Credit</li> <li>Bottom-up &amp; top down quant</li> </ul>	Higher Income	RBA cash + 1.5% to 3%	<2%	Invests in Australian cash, IG credit and hybrids.
<ul> <li>Valuation and credit rating analysis</li> <li>Market making - price discovery</li> <li>Active Asset Allocation</li> <li>Will switch between cash and credit, depending on relative value.</li> </ul>	Long-Short Credit	RBA Cash + 4% to 6%	<5%	<ul> <li>This Fund has an extended universe, higher allowable weightings and can:</li> <li>go long and short securities and derivatives</li> <li>leverage the portfolio up to 4x invested capital.</li> <li>Use credit default swaps</li> </ul>

Internal limits and portfolio targets, which are not part of the PDS and can be subject to change, are as follows:

Investments	
Cash	0% to 100%
Senior investment grade securities	No limit
Subordinated debt	Up to 160%* of invested capital
ABS/RMBS	Up to 99%* of invested capital
Hybrids	Up to 60%* of invested capital (target <30%)
Unrated and/or sub-investment grade debt securities	Up to 40%* of invested capital (target <20%)
Foreign denominated debt issued by non-Australian companies	Up to 40%* of invested capital (target 0%)

Portfolio		
Max 4x Fund Market Value		
Less than 5% pa with targeted volatility of 3%		
Investment Grade (IG) on av. across portfolio, target weight for IG assets > 75%		
High with the ability to offer unitholders daily withdrawal requests		
< 10.5 years		
< 9 months		

\* Assuming maximum 4x leverage

#### **Investment Process**

CCI's investment process is focused on valuation and pricing of the individual bonds in its universe, using both top-down and bottom-up analysis as well as qualitative and quantitative valuation analysis. Essentially, the models estimate 'fair value' credit spreads adjusted for all bond risk factors (rating, maturity, liquidity, default risk, capital stack position etc.).

The manager expects that the majority of value added (75%) would come from quantitative and qualitative fundamental valuation analysis.

Factor	Contribution
Quantitative and Qualitative Fundamental Valuation	~75%
Supply/Demand Technicals	~12.5%
Macro Market Sentiment (Behavioural)	~12.5%

We note that the use of a large number of models, the high frequency trading, and the significant top-down element in the process makes the investment decision process somewhat opaque.

The investment process is multi-dimensional consisting of three key phases:

- The Investment and Governance Mandate (IGM) determines if an asset can be acquired by the Fund or if an existing
  asset can be retained in the Fund.
- Potential investments are subject to both traditional credit analysis (formalised in a report) and a range of quantitative valuation and credit assessment processes.
- The investment undergoes compliance and risk testing and the Portfolio Managers accept/reject and, where appropriate, finalise the pricing/sizing of the investment.

While structured and grounded in the models, the process and the models are being refined on a continuous basis. For example, the quantitative credit rating model has been enhanced by addition of machine learning based predictions model. The manager has always been active in price discovery as well as opportunistic on the Australian market buy-side market-making; over the last year they have formalised their insights into the flow of data reflecting supply and demand for fixed income securities and hence technical analysis has become a more visible part of the process.

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### **BOTTOM-UP VALUATION**

CCI undertakes rigorous bottom-up quantitative asset valuations to price assets based on (a) the issuer's financial characteristics, (b) the asset's capital structure position, and (c) statistical estimates of the probability of default, loss given default, and hence expected loss in light of (a) and (b). These bottom-up models include, among others: several different state-of-the-art "Merton" methods utilising option pricing technology (used by the RBA as a tool for monitoring real-time credit risk), and parametric and nonparametric expected loss models, including techniques that utilise decades of rating agency data on defaults and recovery rates.

#### RATINGS ANALYSIS

CCI calculates its own ratings for credit securities. As an example, CCI estimates default probabilities for the major banks over a future three-year horizon, recalculated daily. They have mapped these default probabilities onto implied credit ratings based on global historical defaults within different S&P ratings since 1920.

#### **TOP-DOWN VALUATION**

CCI has also developed multi-factor top-down, regression-based valuation models that assume current market prices are correct to price assets based on their individual characteristics; credit rating, maturity, liquidity, capital structure position, industry sector, and the terms of the security in question. These top-down statistical valuation models have very high explanatory power (adjusted R-squares over 85%-90%) and are used to identify day-to-day anomalies in secondary asset pricing, and to inform CCI about the expected valuations of new primary issues.

#### LEVERAGE

CCI has a target of 2-3x leverage for this Fund, with a cap at 3x. The two leverage mechanisms used are repurchase agreements (repo) with the major banks or directly via the RBA, and margin lending provided by major banks.

#### NOTE ON QUALITATIVE DUE DILIGENCE

As part of the due diligence in fair value discovery, CCI devotes considerable resources to analysis of the Australian financial regulatory environment, the major issuers, and the main factors affecting interest rate and credit spread movements. CCI is open and transparent in sharing their analysis. In particular, CCI is increasingly using its analysis to interact with major market participants in what they describe as an 'activist' role. This 'activism' is important in the realisation of fair value and assists CCI's asset allocation and trading strategies.

#### **Investment Team**

The CCI team has continued to expand over the last year. There are currently 22 staff members with a team of 16 dedicated investment professionals (four portfolio managers and 11 analysts). The first employee (a senior PM, trader) has been identified for the planned London office and is expected to join in July this year. His role will be to facilitate the trading function of the CCI team.

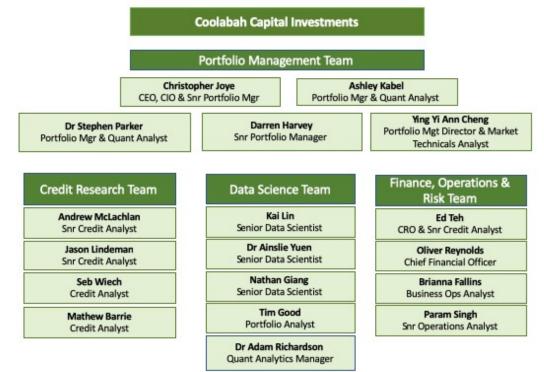

CCI's investment team is large and well resourced, compared to many of its peers, reflecting the highly active and quantitatively complex nature of CCI's investment strategies. The CCI team is managed by Christopher Joye, who is both Co-Chief Investment Officer and Senior Portfolio Manager. It includes a number of investment professionals supported by experienced credit analysts and operational staff.

The team works collaboratively, however, Chris Joye approves every single trade, with two other portfolio managers having limited responsibility. Hence, there is a high level of key man risk in the implementation of the strategy.

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### **PORTFOLIO MANAGERS**

**Christopher Joye (Snr Portfolio Manager)** is a leading financial economist and funds management professional and has led the portfolio management team since inception. He worked for Goldman Sachs in mergers and acquisitions; the RBA in special projects; and he established the quantitative research group Rismark, which also managed asset-backed securities. He has served as a director of The Menzies Research Centre (a think-tank). He publishes extensively on investment issues and has advised several Australian governments on economic policy.

**Darren Harvey (Snr Portfolio Manager)** has spent more than two decades working in the fixed-income markets, including 10 years at Deutsche Bank in Sydney as a Director of Fixed Income and Head of Option Trading, specialising in interest rate solutions; and in London as a Director in Deutsche Bank's proprietary investment team, focusing on fixed income strategies.

Ashley Kabel (Portfolio Manager & Quant Analyst) joined CCI in 2017. Ashley was Director of Quantitative Strategies at The Cambridge Strategy based in London between 2012 and 2016. Cambridge is an award-winning FX Hedge Fund. Before this, between 2005 and 2012, Ashley was an investment analyst with portfolio management responsibilities covering FX, equities, and fixed income. At Invesco he helped develop, analyse, and manage multiple quant strategies including direct execution of fixed income portfolios.

**Dr Stephen Parker (Portfolio Manager & Quant Analyst)** joined CCI in 2016. Dr Parker was previously a futures trader at Star Beta focussing on Australian and US government bonds and the formulation of quantitative trading strategies and risk management models for these markets. In 2013, Dr Parker completed a PhD in Astrophysics from the University of New South Wales that involved developing automated reduction, analysis, and simulation routines relating to the mass distribution of very cold brown dwarf stars' host clusters.

Ying Yi Ann Cheng (Portfolio Management Director & Market Technical Analyst) joined CCI in 2017 as a full-time portfolio management director and market technical analyst focussing on market research, analysis and technical factors, while also assuming responsibility for external stakeholder management. She spent the majority of her career at Citibank in London, specialising in G10 and Emerging Market currencies, advising hedge fund clients and sovereign asset managers on alpha generating and risk management strategies. Prior to the sell side, Ying Yi had interned at Colonial First State and PwC in various quantitative roles.

#### **CREDIT/QUANT ANALYSTS**

Team Member	Role	Experience	Industry Time (Time with CCI)
Ed Teh	Senior Credit Analyst/ Chief Risk Officer	Local and international fixed income, bond insurance and corporate lending	23 (6)
Andrew McLachlan	Senior Credit Analyst	Buy side credit analysis, risk pricing and processes	27 (5)
Jason Lindeman	Senior Credit Analyst	Credit analysis, credit trading and portfolio management in Australia and London	28 (2)
Kai Lin	Senior Data Analyst	Data scientist at CBA building machine learning models	2.3 (2.3)
Dr Ainslie Yuen	Senior Data Scientist	VP at Goldman Sachs NY concentrating on strategy for ABS and RMBS performance	21 (1.4)
Mathew Barrie	Credit analyst	Assistant Manager in corporate finance with BDO; an undergraduate engineer at Winslow Civil Constructors.	3 (1.3)
Sebastian Wiech	Credit analyst	Joined CCI as a graduate	(1)
Nathan Giang	Senior Data Scientist	Senior analyst within the Risk Management Group's Quantitative Applications Division at Macquarie.	4 (0)
Timothy Good	Portfolio Analyst	Trader at proprietary trading house Exponential Trading	2 (1)
Dr Adam Richardson	Quant Analytics Manager	PhD in risk-based optimisation and AI; five years head of R&D at Logistical Risk Management	(1)

#### **Business Management**

#### CORPORATE STRUCTURE

Smarter Money Investments P/L is 100% owned by Coolabah Capital Investments P/L (CCI), the Fund sub-manager. CCI, in turn, is 75% owned by members of the investment team and 25% owned by Pinnacle Investment Management (ASX:PNI).

#### **Compliance and Risk Management**

#### **RESPONSIBLE ENTITY**

The Responsible Entity has the primary legal responsibility for monitoring compliance by the Investment Manager with the Fund's PDS and IGM. Compliance with the Investment Mandate is also achieved through monitoring by the portfolio managers and CCI's separate Investment Committee and Risk and Compliance Committee. These are both chaired by experienced Super Fund Director, Melda Donnelly, with independent members including former Super Fund Director, Robert Henricks, and compliance expert, Alex Wise. The Committee meets monthly. Detailed compliance procedures are in place that include notification of significant events or breaches to the Compliance Committee and the Board, notification requirements, compliance reviews, and audit requirements.

The Responsibility Entity has a Compliance Committee and a dedicated Compliance Manager. The Responsible Entity has appointed Mainstream Fund Services as Administrator for the Fund, responsible for processing investment applications, unit registry, distributions and redemptions, anti-money laundering monitoring, investor reporting and investor services.

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

The Fund's assets are independently valued on a daily basis by the Fund Administrator. Unit prices at which investors can buy or sell units are also calculated on a daily basis by Mainstream. Mainstream uses the industry standard administration system, HiPortfolio, as the fund accounting system that provides trade and investment cycle functionality.

The Fund's assets are held on behalf of the Fund's investors by BNP Paribas Securities Services; one of the world's largest providers of custodial services.

As at the date of this report, SMI's insurance cover is under the policy by Chubb Insurance Company of Australia and includes Professional Indemnity (of \$5 million), Directors and Officers of \$5 million, and Crime (of \$2 million). The combined maximum limit is (\$12 million).

#### **CCI GOVERNANCE**

The Board of Directors is chaired by Melda Donnelly, who is extremely experienced, having been previously CEO of QIC, Managing Director of ANZ Funds Management, a Director of Unisuper and VFMC, and a current member of the HESTA investment committee. Bob Henricks, the former chair of the \$7 billion super fund, Energy Super, is an independent member of both the Investment Committee and the Risk and Compliance Committee. Alex Wise, an experienced compliance and risk expert, sits on the Risk & Compliance Committee.

#### CCI RISK MANAGEMENT SYSTEMS

In 2017, CCI transitioned to the Bloomberg Asset and Investment Manager (AIM) system, which is an "industrial scale" fixedincome order management, portfolio management, compliance, middle-office, and back-office asset management system used by over 800 institutions globally. This system represents a significant ongoing cost but it allows CCI to manage upwards of 20 portfolios using global mult-asset strategies. CCI's Bloomberg AIM system enables the following analytics:

- live portfolio revaluations and portfolio weights intra-day;
- provides dashboard view of individual portfolio exposures by security type, issuer, and sector;
- pre-trade investment compliance across a large number of mandate rules; and
- pre- and post-trade portfolio analytics including modified duration, spread duration, and credit rating distributions.

AIM provides real-time position management and portfolio analysis, enabling portfolio managers to measure a portfolio versus a benchmark and allowing traders and risk managers to view aggregate risk metrics. CCI's core quantitative valuation models directly interface with Bloomberg and are autmatically updated daily.

#### MIDDLE/BACK-OFFICE

CCI's internal middle-office, including a dedicated CFO and an operations analyst, uses Visual Basic to automate settlement processing. CCI's retail funds' accounting, unit registry, tax and general fund administration, and back-office services are outsourced to Mainstream Fund Services, which has circa \$130bn in fund administration assets. Mainstream Fund Services uses the HiPort system for unit pricing and portfolio valuations.

CCI outsources all Responsible Entity services to Equity Trustees Limited, which has over \$7bn in trust assets and its own independent compliance systems. Custody services are outsourced to BNP Paribas, which is one of the world's largest custodians.

CCI uses the CompliSpace enterprise-wide risk management, compliance and governance system. CompliSpace services over 600 clients in Australia including numerous large institutional fund managers. They have 69 staff across Australia with offices in Sydney, Melbourne, and Perth, and staff in Adelaide and Canberra.

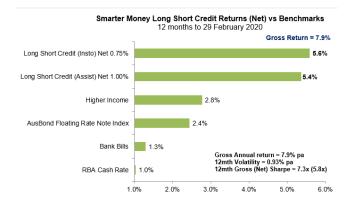

Fund Rating/Ranking: VERY STRONG Fund Report Date: 23 April 2020

#### Performance

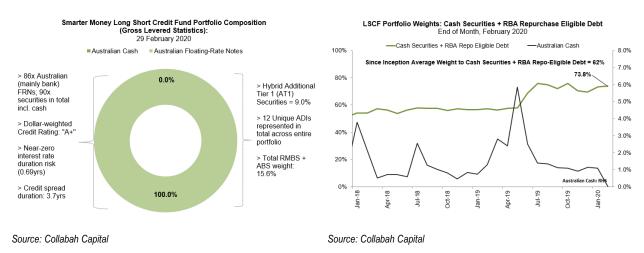

Returns since inception have been below the objective; in the year to February 2020, returns have been in line with the lower end of the objective range.

Period	Gross	Net	RBA Cash	Net
Ending	Return	Return	Rate	Excess
29/02/2020	(Assist)	(Assist)	nate	Return
1 month	-0.40%	-0.39%	0.06%	-0.45%
3 month	0.80%	0.42%	0.19%	0.24%
6 month	1.92%	1.10%	0.39%	0.71%
1 year	7.86%	5.36%	1.05%	4.31%
2 years pa	6.01%	3.96%	1.27%	2.69%
Inception pa Aug 2017	6.23%	4.17%	1.31%	2.86%

Source: Smarter Money Long Short Credit Fund Performance Report, Feb 2020

Source: Bloomberg, RBA, Coolabah Capital

The market turmoil caused by COVID-19 is likely to create considerable challenges as well as some opportunities for all investors over the next 6-12 months. We believe that CCI is in a relatively strong position to weather these challenges and take advantage of the opportunities, mainly due to their nimble strategy and the quality and liquidity of their portfolio. Nonetheless, investors should be prepared for a more volatile pattern of returns and accept a potentially extended time horizon for achievement of the strategy's return objective.

#### 

Fund Rating/Ranking: VERY STRONG Fund Report Date: 27 March 2020

#### **Investment Rating Scale**

The Australia Ratings Analytics investment rating is an opinion on how well we believe a fund will perform against a range of risks.

Rating	Definition
Superior	Indicates the highest level of confidence that the fund can deliver a risk adjusted return in line with the investment objectives of the fund.
Very Strong	Indicates a very strong conviction that the fund can deliver a risk adjusted return in line with the investment objective of the fund.
Strong	Indicates a strong conviction that the fund can deliver a risk adjusted return in line with the investment objective of the fund.
Competent	Indicates that the fund may deliver a return in line with the funds relevant benchmark.
Weak	Indicates a view that the fund is unlikely to deliver a return in line with the investment objective of the fund and/or meet the returns of its benchmark.

#### **Product Complexity Indicator**

A Product Complexity Indicator (PCI) highlights the complexity of an investment by its terms and conditions' structure and transparency that may affect the investor's return.

#### Investment Rating & Product Complexity Methodology

#### Disclaimer

This report has been prepared solely by Australia Ratings Analytics Pty Ltd. under Australian Financial Services Licence No. 494552. This report is for information purposes only. It is neither an offer to sell nor a solicitation of any offer to purchase any securities in an investment product or managed investment scheme. Any investment in a financial product or fund involves a degree of risk. It is important to note that past performance is not an indication of future performance.

An investment rating reflects Australia Ratings Analytics' current opinion of a fund's or investment's ability to achieve its stated investment objectives in the near term. The rating expresses a view on the expected consistency of the fund's or Investment's performance within the peer/style groups and the ability of the manager to produce superior performance amongst its peers in the near term with due regard to the medium term consensus view of the asset class to which the product is benchmarked.

The investment rating and research report will maintain current, unless amended, until the anniversary date of the report. The investment rating and research report reflects the research methodology published on the website of Australia Ratings Analytics. Ratings are assigned according to Australia Ratings Analytics investment scale which ranges from Superior to Weak and is described on the website.

Australia Ratings Analytics has made every effort to ensure the reliability of the views and rating expressed in this report and those published on its website. Australia Ratings research is based upon information provided by the investment manager that which is known to us or which was obtained from sources which we believed to be reliable and accurate at time of publication. All opinions and views expressed constitute judgment as of the date of the report and may change at any time without notice and without obligation. Such information may be based on certain assumptions and involve elements of subjective judgment and analysis. Australia Ratings Analytics Pty Ltd has received a fee paid by either the fund manager or investment product sponsor for the rating and this report.

This report is prepared for general information only, and individual financial positions, objectives and circumstances have not been taken into consideration. Individuals should therefore discuss, with their financial planner or advisor, the merits of each rating for their own specific circumstances and realise that not all investments will be appropriate for all subscribers. Investment returns can go up and down. Past performance is not necessarily indicative of future performance.

To the extent permitted by law, Australia Ratings Analytics Pty Ltd and its employees, agents and authorised representatives exclude all liability for any loss or damage (including indirect, special or consequential loss or damage) arising from the use of, or reliance on, any information within the report whether or not caused by any negligent act or omission. If the law prohibits the exclusion of such liability, Australia Ratings Analytics Pty Ltd hereby limits its liability, to the extent permitted by law, to the resupply of the said information.
