This Product Disclosure Statement ("PDS") was issued on 24 June 2026. This PDS is for the offer of interests in the Coolabah Global Floating- Rate High Yield Complex ETF (CBOE:YLDX) (referred throughout this PDS as the "Class"), a class of the Coolabah Global Floating-Rate High Yield Fund ARSN 682 667 072 ("Fund").

The PDS has been prepared and issued by Equity Trustees Limited (ABN 46 004 031 298, Australian Financial Services Licence ("AFSL") No. 240975) in its capacity as the responsible entity of the Fund (referred throughout this PDS as the "Responsible Entity", "Equity Trustees", "us" or "we"). The investment manager is Coolabah Capital Investments (Retail) Pty Ltd (referred to throughout this PDS as the "Investment Manager" or "CCIR"). Coolabah Capital Investments (Retail) Pty Ltd is a corporate authorised representative (#000414337) of Coolabah Capital Institutional Investments Pty Ltd (AFSL 482238). The portfolio manager of the Fund is Coolabah Capital Institutional Investments Pty Ltd ("CCII" or "Portfolio Manager"). Both the Investment Manager and Portfolio Manager are wholly owned subsidiaries of Coolabah Capital Investments Pty Ltd ("CCI" or "Coolabah").

At the time of lodgment of this PDS with ASIC, the Responsible Entity has made an application to a Securities Exchange Operator for the quotation of the Fund on the Securities Exchange with the exchange ticker: YLDX. If the application is approved by the Securities Exchange Operator and the Fund is quoted on the Securities Exchange, the Fund will be able to be traded on the Securities Exchange. No representation is made concerning the Fund's quotation on the Securities Exchange. Neither ASIC nor the Securities Exchange Operator takes any responsibility for the contents of this PDS.

The Responsible Entity has authorised the use of this PDS as disclosure to investors and prospective investors who invest directly in the Fund, as well as investors and prospective investors of an investor directed portfolio service, master trust, wrap account or an investor directed portfolio service-like scheme ("IDPS"). This PDS is available for use by persons applying for Units through an IDPS ("Indirect Investors").

This PDS is prepared for your general information only. It is not intended to be a recommendation by the Responsible Entity, Investment Manager and the Portfolio Manager, any associate, employee, agent or officer of the Responsible Entity, Investment Manager and the Portfolio Manager or any other person to invest in the Fund. This PDS does not take into account the investment objectives, financial situation or needs of any particular investor. You should not base your decision to invest in the Fund solely on the information in this PDS. You should consider whether the information in this PDS is appropriate for you, having regard to your objectives, financial situation and needs and you may want to seek professional financial advice before making an investment decision.

Equity Trustees, the Investment Manager, the Portfolio Manager and their employees, associates, agents or officers do not guarantee the success, repayment of capital or any rate of return on income or capital or the investment performance of the Fund. Past performance is no indication of future performance. An investment in the Fund does not represent a deposit with or a liability of Equity Trustees, the Investment Manager, the Portfolio Manager or any of their associates. An investment is subject to investment risk, including possible delays in repayment and loss of income or capital invested. Units in the Fund are offered and issued by the Responsible Entity on the terms and conditions described in this PDS. You should read this

PDS in its entirety because you will become bound by it if you become a direct investor in the Fund.

The forward-looking statements included in this PDS involve subjective judgment and analysis and are subject to significant uncertainties, risks and contingencies, many of which are outside the control of, and are unknown to, Equity Trustees, the Investment Manager and the Portfolio Manager and their officers, employees, agents and associates. Actual future events may vary materially from the forward-looking statements and the assumptions on which those statements are based. Given these uncertainties, you are cautioned to not place undue reliance on such forward-looking statements.

In considering whether to invest in the Fund, investors should consider the risk factors that could affect the financial performance of the Fund. The significant risk factors affecting the Fund are summarised in Section 7.

The offer to which this PDS relates is only available to:

- Retail and Wholesale Clients (as defined in the Glossary) and
- Retail and Wholesale Clients (as defined in the Glossary) via an IDPS or IDPS-like scheme (commonly known as a master trust or a wrap account) or a nominee or custody service, receiving this PDS (electronically or otherwise) in Australia.

This PDS is not an offer or invitation in relation to the Fund in any place in which, or to any person to whom, it would not be lawful to make that offer or invitation. Persons who come into possession of this PDS in jurisdictions outside Australia should seek advice and observe any such restrictions. All references to dollars or "\$" in this PDS are to Australian dollars.

This PDS does not constitute a direct or indirect offer of securities in the US or to any US Person as defined in Regulation S under the US Securities Act of 1933 as amended ("US Securities Act"). Equity Trustees may vary its position and offers may be accepted on merit at Equity Trustees' discretion. The Fund has not been, and will not be, registered under the US Securities Act unless otherwise determined by Equity Trustees and may not be offered or sold in the US to, or for, the account of any US Person (as defined) except in a transaction that is exempt from the registration requirements of the US Securities Act and applicable US state securities laws.

If you received this PDS electronically, you will need to print and read this document in its entirety. We will provide a paper copy free upon request during the life of this PDS.

Certain information in this PDS is subject to change from time to time. Information that is not materially adverse information can be updated by the Responsible Entity. You can obtain any updated information:

- by contacting Coolabah on 1300 901 711; or
- by visiting the Coolabah website at www.coolabahcapital.com

A paper copy of the updated information will be provided free of charge on request.

You may also contact Equity Trustees:

- by writing to GPO Box 2307 Melbourne VIC 3001; or
- by calling +613 8623 5000

Unless otherwise stated, all fees quoted in the PDS are inclusive of GST net of any Reduced Input Tax Credits ("RITC"). All amounts are in Australian Dollars unless otherwise specified. All references to legislation are to Australian law unless otherwise specified.

1. Fund at a glance

Name of the fund	Coolabah Global Floating-Rate High Yield Complex ETF	Cover page
ARSN	682 667 072	Cover page
Ticker	YLDX	Cover page
Responsible Entity	Equity Trustees Limited (ABN 46 004 031 298 AFSL 240975)	Section 2
Investment Manager	Coolabah Capital Investments (Retail) Pty Ltd (ABN 64 153 555 867)	Section 2
Investment objective	<p>The investment objective of the Fund is to provide investors with exposure to a global floating-rate portfolio of investment-grade bonds and hybrid securities with enhanced yields.</p> <p>The investment objective is not intended to be a forecast. It is only an indication of what the investment strategy aims to achieve over a rolling 12 month period. The Fund may not achieve its investment objective. Returns are not guaranteed.</p>	Section 3
Fund Benchmark	<p>Bloomberg AusBond Credit FRN 0+ Yr Index (BAFRN0)</p> <p>This Benchmark is not a return objective and is used for performance reporting only.</p>	Section 3
Investment strategy	<p>The Fund focusses more on generating higher income than other traditional fixed income investments by investing in a portfolio of investment-grade bonds, hybrid securities and enhancing the yields (or interest-rate) through the use of gearing (or leverage).</p> <p>The Fund's investment strategy may involve borrowing, using repurchase agreements to achieve "leverage". Any use of leverage is aimed to increase the Fund's exposure to mispriced bonds that can provide capital gains as their price appreciates in addition to the income they pay.</p> <p>If the Fund uses leverage, this can be expected to magnify both the investment gains and losses, and consequently significant variations in the value of the Fund's investments can be expected. The Fund may therefore involve risks that are not present in un-leveraged fixed income funds.</p>	Section 3
The type(s) of investor(s) for whom the Fund would be suitable	<p>An investment in the Fund may be suitable for investors seeking:</p> <ul style="list-style-type: none"> • higher income than other traditional fixed income investments through geared (or leveraged) portfolio of investment grade bonds and hybrid securities; • exposure to assets with a yield that generally moves up and down in line with a central bank reference rate, such as RBA's cash rate; • exposure to the global wholesale bond market; or • potential for consistent monthly income. <p>The Fund carries certain investment risks. For more information on the risks applicable to the Fund see section 5.</p> <p>The Fund's use of derivatives and leverage may make the investment strategy of the Fund riskier than some other fixed income funds available in the Australian market. Potential investors should consider their tolerance for risk and their particular investment objectives and circumstances, in consultation with a professional adviser before making an investment decision. An investment in the Fund should only be considered as a component of an investor's overall portfolio.</p>	Sections 3 and 5
Recommended investment timeframe	<p>The suggested investment timeframe is 3 years or more.</p> <p>The Investment Manager has set the timeframe having regard to the investment "standard risk measure" developed by industry to compare investment options that are expected to deliver a similar number of negative annual returns over any 20 year period. Refer to section 5 "risk measure" for more details.</p> <p>Your investment timeframe will depend on your own personal circumstances and you should talk to your financial adviser to determine your particular investment timeframe.</p>	Sections 3 and 5

Net Asset Value	<p>The Net Asset Value (“NAV”) of the Class is calculated by deducting the liabilities (including any accrued fees) of the Fund from the aggregate value of assets. The NAV published on a particular Trading Day reflects the value of the Fund on the previous day at the close of trading in each market in which the Class invests.</p> <p>The NAV per Unit is calculated by dividing the NAV by the number of Units on issue in the Class.</p> <p>An indicative NAV per Unit (“iNAV”) will be published by the Class throughout the Trading Day. The iNAV will be updated using a real time fair value methodology that seeks to ensure that the iNAV reflects movements in markets and currencies during the Trading Day.</p>	Section 4
Minimum initial investment	There is no minimum number of units that investors can buy on the Securities Exchange.	Sections 4, 6 and 7
Minimum additional investment	There is no minimum number of units that investors can buy on the Securities Exchange.	Sections 4, 6 and 7
Minimum withdrawal amount	There is no minimum number of units that investors can sell on the Securities Exchange.	Sections 4, 6 and 7
Minimum balance	There is no minimum balance of units required to be held on the Securities Exchange.	Sections 4, 6 and 7
Cut off time for applications and withdrawals	Applications and withdrawals on the Securities Exchange: Close of the Trading Day.	Sections 4, 6 and 7
Entering and exiting the Fund	<p>Investors can enter the Fund, by buying Units on the Securities Exchange through a stockbroker using your HIN.</p> <p>Investors can exit the Fund by selling Units on the Securities Exchange.</p>	Sections 4, 6 and 7
Market liquidity	<p>The Responsible Entity, on behalf of the Fund, may provide liquidity to investors on the Securities Exchange by acting as a buyer and seller of units. The Responsible Entity will create or cancel units by applying for or redeeming its net position in units bought and sold on the Securities Exchange at the end of each Trading Day. The Responsible Entity has appointed a market participant to act as its agent to execute its market making activities. There may be circumstances where the Fund is suspended in accordance with the Constitution or where the Fund is not liquid as defined under the Corporations Act. In those cases, the Class may continue to trade on the Securities Exchange provided the Class complies with Securities Exchange Rules. The Responsible Entity or the Securities Exchange may seek a trading halt, if the Class ceases to comply with the Securities Exchange Rules.</p> <p>Alternatively, there may be circumstances where the Securities Exchange suspends trading of Units. Where Units are suspended from trading on the Securities Exchange for more than 5 consecutive Trading Days, investors have a right to withdraw directly from the Fund, provided that withdrawals have not also been suspended in accordance with the Constitution.</p>	Sections 4 and 6
Transaction confirmations	Investors buying or selling Units on the Securities Exchange will receive transaction confirmations from their stockbroker, including a HIN.	Sections 6 and 7
Income distribution	Distributions will generally be made monthly (on the last Trading Day of the month) but may be made more or less frequent at the discretion of the Responsible Entity.	Section 4
Management fees and costs	1.00% p.a. of the NAV. Please refer to section 8 for a detailed explanation of fees and costs.	Section 8
Transaction costs	Estimated at 0.00% p.a. (gross) of the NAV of the Class.	Section 8
Performance fee	Not applicable.	Section 8
Entry fee/exit fee	Nil.	Section 8
Buy/Sell Spread	Buying or selling Units on the Securities Exchange: determined by market participants.	Section 8

2. Who is Managing the Fund?

The Responsible Entity

Equity Trustees Limited

Equity Trustees Limited (ABN 46 004 031 298, AFSL 240975), a subsidiary of EQT Holdings Limited (ABN 22 607 797 615), which is a public company listed on the Australian Securities Exchange (ASX: EQT), is the Fund's responsible entity and issuer of this PDS. Established as a trustee and executorial service provider by a special Act of the Victorian Parliament in 1888, today Equity Trustees is a dynamic financial services institution which continues to grow the breadth and quality of products and services on offer.

Equity Trustees' responsibilities and obligations as the Fund's responsible entity are governed by the Fund's constitution, as amended from time to time ("Constitution"), the Corporations Act and general trust law. Equity Trustees has appointed Coolabah Capital Investments (Retail) Pty Ltd as the investment manager of the Fund.

The Investment Manager

Coolabah Capital Investments (Retail) Pty Ltd

The Investment Manager is Coolabah Capital Investments (Retail) Pty Ltd ABN 64 153 555 867 (CCIR), which is a corporate authorised representative (#000414337) of Coolabah Capital Institutional Investments Pty Ltd ABN 85 605 806 059, AFSL 482238.

CCIR has appointed its related entity, Coolabah Capital Institutional Investments Pty Ltd (CCII), as the Portfolio Manager to which it sub-delegates all portfolio management responsibilities for the Fund and its other fixed-income products. Both the Investment Manager and Portfolio Manager are wholly owned subsidiaries of Coolabah Capital Investments Pty Ltd (CCI). CCI is 62% owned by its portfolio management team, and 38% owned by Pinnacle Investment Management Group Limited, a leading Australian-based multi-affiliate investment firm.

Established in 2011, CCI aims to deliver actively managed investment solutions that outperform traditional fixed-income products on a risk-adjusted basis. CCI aims to achieve this through generating "alpha" or capital gains in liquid high-grade credit, which is in contrast to traditional fixed-income strategies that drive returns through adding more interest rate duration risk, credit default risk or illiquidity risk (or "beta"). As of 31 March 2026, CCI managed over \$18.5bn.

The Portfolio Manager

Coolabah Capital Institutional Investments Pty Ltd

The Investment Manager has appointed CCII, as the Portfolio Manager of the Fund. The Portfolio Manager's experienced investment team at the date of issue of this PDS comprises eleven full-time portfolio managers and traders, and fifteen full-time analysts who apply intensive quantitative and qualitative valuation analysis to identify mispriced securities that can be profitably translated into active returns. This team is augmented by an experienced independent chair and an independent compliance committee specialist and compliance oversight by Equity Trustees as the Responsible Entity.

Under the investment management agreement between the Investment Manager, Portfolio Manager and Equity Trustees, Equity Trustees can terminate the Investment Manager or Portfolio Manager's appointment where the Investment Manager or Portfolio Manager becomes insolvent, materially breaches the agreement, ceases to carry on its business or in certain other circumstances. In the event that Equity Trustees terminates the Investment Manager or Portfolio Manager following one of these events, the Investment Manager or Portfolio Manager's appointment would cease upon any termination date specified in the notice, and the Investment Manager or Portfolio Manager would be entitled to receive fees in accordance with the agreement until the effective date of termination.

The Administrator

Apex Fund Services Pty Limited

The Responsible Entity has appointed Apex Fund Services Pty Limited (Apex) to act as administrator for the Fund (Administrator). In such capacity, the Administrator performs all general administrative tasks for the Fund, including keeping financial books and records and calculating the Net Asset Value of the Fund. The Administrator also provides Unit registry services. The Responsible Entity has entered into an Administration Agreement with the Administrator, which governs the services that will be provided by the Administrator to the Fund. The Investment Manager may at any time, in consultation with the Responsible Entity, select any other administrator to serve as administrator to the Fund.

The Custodian

Citigroup Pty Limited

The Responsible Entity has appointed Citigroup Pty Limited as an independent custodian to hold the assets of the Fund (Custodian). In such capacity, the Custodian will hold the assets of the Fund in its name and act on the direction of the Responsible Entity to effect cash and investment transactions.

The Responsible Entity has entered into a custodian agreement, which governs the services that will be provided by the Custodian to the Fund. Certain assets may also be held in safe custody at the Responsible Entity or Equity Trustees Ltd as its delegate.

The Custodian has no supervisory role in relation to the operation of the Fund and has no liability or responsibility to you for any act done or omission made in accordance with the Custodian Agreement.

Fund Auditor

Ernst & Young (ABN 75 288 172 749) has been appointed as the independent auditor of the Fund's financial statements. PWC has been appointed as the independent auditor of the Fund's Compliance Plan. Neither Ernst & Young nor PWC are responsible for the operation or the investment management of the Fund and have not caused the issue of this PDS.

3. How the Fund invests

3.1 Investment Objective

The investment objective of the Fund is to provide investors with exposure to a global floating-rate portfolio of investment-grade bonds with enhanced yields.

The investment objective is not intended to be a forecast. It is only an indication of what the investment strategy aims to achieve over a rolling 12 month period. The Fund may not achieve its investment objective. Returns are not guaranteed.

Investor suitability

An investment in the Fund may be suitable for investors seeking:

- higher income than other traditional fixed income investments through geared (or leveraged) portfolio of investment grade bonds and hybrid securities,
- exposure to assets with a yield that generally moves up and down in line with a central bank reference rate, such as RBA's cash rate,
- exposure to the global wholesale bond market, or
- the potential for consistent monthly income.

3.2. Investment Strategy

The Portfolio Manager is an active manager. This entails applying bottom-up fundamental analysis of both issuers of the securities and the credit quality and structural features of the securities themselves to build a portfolio of cash and debt investments, that are assessed to offer attractive total returns whilst minimising the risk of capital loss.

The Fund focusses more on generating higher income than other traditional fixed income investments by investing in a floating-rate portfolio of investment-grade bonds and hybrid securities issued predominately by global banks, insurers and governments and enhancing the yields (or interest-rate) through the use of gearing (or leverage).

The Portfolio Manager seeks to limit the Fund's interest rate risk, as defined by changes in capital values resulting from interest rate movements, by investing primarily in short-term deposits and floating-rate debt securities, also known as 'Floating-Rate Notes' ("FRNs") or 'Floating-Rate Bonds'. FRNs are a type of bond that pay an interest (or coupon) rate which moves up and down with changes in a recognised reference interest rate. The interest (or coupon) rate is the sum of the reference rate and a spread or margin. In Australia, they generally track the returns of the RBA's cash rate plus a spread or margin and have a low or near-zero interest rate risk.

The Portfolio Manager may also invest in fixed-rate bonds with maturities no greater than 12 months unless the interest rate is hedged to floating with a target of keeping the portfolio's interest rate duration risk to less than 3 months.

While the Fund intends to be fully invested, it retains the ability to switch between cash and debt securities based on the Portfolio Manager's valuation views of each sector. The ability to invest 100% in cash is a defensive attribute of the Fund.

The Fund's investment guidelines and restrictions include:

- the Fund is permitted to invest in bonds (including asset-backed securities) and hybrid securities issued by governments and government-related entities, banks and corporates in G10 currencies,
- the Fund is also permitted to invest in cash and cash-equivalent securities, repurchase agreements, and both exchange traded Derivatives and over-the-counter Derivatives for hedging purposes,
- the Fund may also invest in units in an exchange traded fund ("ETFs") or trust that solely invests in cash or cash-like

securities, issued by banks or Authorised Deposit-taking Institutions ("ADIs") or an overseas equivalent that are regulated by the Australian Prudential Regulation Authority ("APRA") or an overseas equivalent,

- all the Fund's investments are Australian dollar-denominated or fully hedged into Australian Dollars (so the Fund has minimal direct exposure to foreign exchange risk),
- the Fund aims to minimise any risks associated with the change in interest rates by targeting a floating-rate portfolio with interest-rate duration exposure of less than 3 months,
- the Fund does not invest in equities or unrated unlisted debt securities or property,
- the Fund's use of repurchase agreements and Derivatives may result in the Fund being geared, and
- the Fund has a medium risk rating under the "standard risk measure" (see Section 5 of this PDS for details).

Due to movements in the market or similar events, the guidelines set out above may not be adhered to from time to time. In these circumstances, the Portfolio Manager will seek to bring the Fund's investments within the guidelines within a reasonable period of time.

Changing the investment strategy

The investment strategy and asset allocation parameters may be changed. If a change is to be made, investors in the Fund will be notified in accordance with the Corporations Act.

3.3. Investments of the Fund

The Fund offers investors exposure to assets that are traditionally defined as defensive, including:

- cash and cash equivalents;
- domestic and offshore government bonds;
- domestic and offshore senior and subordinated bonds;
- domestic and offshore hybrid securities; and
- asset-backed securities.

The derivatives used by the Fund may be exchange traded or OTC and may include, but are not limited to, the following:

- interest rate derivatives;
- credit derivatives;
- foreign exchange derivatives; and
- other related swaps.

The Fund invests in assets of investment-grade quality, which means assets with at least a BBB- credit rating from a recognised rating agency. The Fund does not target equities investments, focusing on securities ranking higher up the capital structure. The Fund does not adhere to pre-defined sectoral limits because the Investment Manager and the Portfolio Manager believe that this type of blind diversification can introduce correlated default and liquidity risks.

3.4. Valuation, location and custody of assets

The Fund's assets are valued on a daily basis and provided to the Fund's independent administrator, who then calculates the daily unit prices for the Fund.

Australian denominated assets will be held in custody in Australia. Any non-Australian denominated bonds will be held by an offshore custodian in the country of their denomination under a sub-custody agreement with the Custodian and hedged to Australian dollars.

The value of the investments of the Fund is generally determined daily. The value of a Unit is determined by the NAV

per Unit. This is calculated by deducting from the gross value of the assets of the Fund the value of the liabilities of the Fund (not including any investor liability). Generally, investments will be valued on each Business Day at their market value but other valuation methods and policies may be applied by the Administrator if appropriate or if otherwise required by law or applicable accounting standards.

3.5. Leverage

The Fund can borrow, use repurchase agreements, and use Derivatives and this can mean the Fund is geared (or leveraged). Leverage can amplify gains and also amplify losses. At the core of the Portfolio Manager's use of leverage is that it is applied against liquid, investment-grade debt securities, which rank ahead of equities and hybrids in the corporate capital structure. The Portfolio Manager has set leverage limits and other exposure limits to assist with risk management, which is overseen by the Portfolio Manager's independent compliance committee.

Leverage may be used to obtain additional exposure to assets to increase the Fund's yield or to obtain additional exposure to mispriced assets that the Portfolio Manager believes will generate capital gains for the Fund. The Fund will typically have gearing of 66.66% to a maximum of 75%. The Fund may enter into repurchase agreements with large bank counterparties that have credit ratings of at least A-. The Fund may also enter into other secured borrowing arrangements with various prime brokerage providers.

The following example illustrates the way in which gearing can affect investment gains and losses in comparison to a fund that is not geared.

Example	Geared	Ungeared
Initial investment	\$4,000	\$4,000
Fund gearing level	75.00%	0.00%
Amount borrowed by Fund	\$12,000	\$0
Amount invested in market	\$16,000	\$4,000

If the value of the Fund's assets rises by 2.0%		
Rise in value of Fund's assets	\$320	\$80
Value of Fund assets	\$16,320	\$4,080
Outstanding loan	\$12,000	\$0
Value of investment	\$4,320	\$4,080
Gain on investment	\$320	\$80
Return %	8.0%	2.0%

If the value of the Fund's assets falls by 2.0%		
Fall in value of Fund's assets	-\$320	-\$80
Value of Fund assets	-\$15,680	\$3,920

Example	Geared	Ungeared
Outstanding loan	\$12,000	\$0
Value of investment	\$3,680	\$3,920

Example	Geared	Ungeared
Loss on investment	\$320	-\$80
Return %	-8.0%	-2.0%

The leverage rules are asset-class specific, with riskier exposures subject to tighter controls. They are designed to reduce the risk of loss and to manage portfolio volatility within the target range. Please refer to Section 5 'Managing risk' for more details on this subject.

3.6. Derivatives

A derivative is any financial product that derives its value from another security, index or liability.

The Fund may use derivatives to manage (or 'hedge') risks.

The Fund may invest in OTC and exchange traded derivatives, comprising the following types of derivatives:

- interest rate derivatives;
- credit derivatives;
- foreign exchange derivatives; and
- other related swaps.

Under the Securities Exchange Rules, if the Fund's exposure to OTC derivatives exceeds 5% of the Fund's NAV, the Responsible Entity must disclose on a monthly basis:

- the exposure of the Fund to all OTC derivative counterparties as a percentage of the NAV of the Fund; and
- the value of the assets held by the Fund (excluding the value of the OTC derivatives but inclusive of collateral) as a percentage of the NAV of the Fund.

In accordance with the Securities Exchange Rules, the Responsible Entity monitors the Fund's exposure to all OTC derivative counterparties on a daily basis. In the event that the aggregate exposure of the Fund to all OTC derivative counterparties exceeds 10% of NAV, the Responsible Entity will take steps within one Trading Day to acquire further collateral to ensure that the exposure of all OTC derivatives counterparties is reduced to 10% or less of NAV. Only cash may be held by the Fund as collateral under an OTC derivative.

3.7. Short Selling

The Fund does not enter into short selling positions.

3.8 Labour Standards, Environmental, Social and Ethical Factors ("ESG considerations")

Equity Trustees has delegated the investment function (including ESG considerations) to the Investment Manager. The Investment Manager has delegated these responsibilities to the Portfolio Manager to which it sub-delegates all portfolio management responsibilities for the Fund and its other fixed-income products. The Portfolio Manager has contemplated that labour, environmental, social and ethical considerations will be taken into account in relation to the investment of the Fund.

The Portfolio Manager considers that environmental, social and governance (ESG) factors are important inputs into its investment process and can have notable consequences for the performance of its investments. These consequences extend beyond merely downside risks; they may also include potential

upside for the portfolio, such as opportunities arising from ESG factors being overlooked or mispriced by the market, with both market participants and rating agencies often failing to appreciate the full nuance of these factors. Consequently, the consideration and due diligence of ESG factors, both quantitatively and qualitatively, form an important part of the Portfolio Manager's broader investment process. However, these factors may not necessarily be assessed in accordance with any predetermined weighting or methodology.

Examples of the types of ESG factors that the Portfolio Manager takes into account as part of its investment process include, but are not limited to:

Environmental:

- Climate and weather-related risks.
- Dependency on assets which may be impacted by environmental considerations.
- Pollution and environmental disruption.
- Environmental sustainability.

Social:

- Political stability in countries of operation.
- Track record and policies on labour, human rights and modern slavery.
- Diversity and inclusion.
- Workplace health and safety, including employee wellbeing.
- Commitment to maintaining internal and customer privacy, including cyber-security.
- Impact on customers and local communities.
- ESG-related reputational and brand risks.

Governance:

- Board and governance composition.
- Risk management and compliance track-record.
- Litigation and regulatory history.

The Fund is not designed for investors who have specific ESG considerations or goals. The integration of ESG considerations into the investment process of the Fund described above does not imply that the Fund is marketed or authorised as an ESG product in Australia.

The Portfolio Manager's ESG and Stewardship Policy (available here: www.coolabahcapital.com/esg-policy) provides further detail on how ESG factors are proactively considered and integrated into its broader investment and decision-making process.

3.9. Fund performance

The recent performance of the Fund will be available at www.coolabahcapital.com. Your financial adviser can also provide further information on the Fund.

Remember that quoted unit prices will be historical and not necessarily the price you will receive when applying or withdrawing.

3.10. Investment timeframe

The suggested investment timeframe is 3 years or more, having regard to the underlying fixed income investments and other investment strategies such as the use of derivatives and leverage (discussed in section 3). In suggesting this timeframe we have not taken into account your individual objectives, financial circumstances or needs. Consider whether this product is right for you and consult a financial adviser before making a decision to buy or continue to hold this product.

3.11. Significant benefits of investing in the Fund

Significant benefits	
Potential for higher income	The Fund aims to generate higher income than other traditional fixed income investments.
Floating returns	The Fund targets a floating-rate portfolio with asset yields that generally move up and down with the RBA cash rate, or the overseas equivalent.
Exposure to the global bond market	The Fund invests in wholesale bonds issued by global governments, banks and companies that are not always easy for individual investors to access.
Global presence	Access to the investment knowledge of Coolabah's global investment team.

4. About the Fund and Units

Investors' application monies are pooled together with other investors' money. The Investment Manager pools the application monies of all unitholders to buy investments and manage them on behalf of unitholders in accordance with the Fund's investment strategy. By investing in the Fund, unitholders have access to investments they may not be able to access on their own and benefit from the investment capabilities of Coolabah's investment team. The Fund serves as an efficient mechanism to invest on behalf of all unitholders.

Investors can enter the Class through acquiring Units on the Securities Exchange or through an IDPS provider. Investors can exit the Class through selling Units on the Securities Exchange or redeeming Units through an IDPS.

Units and NAV per Unit

The Securities Exchange has approved the Class to be quoted for trading on the Securities Exchange.

The NAV estimates the value of the Class at the close of trading on a previous day in each market in which the Class invests. The NAV per unit will be published daily on the Investment Manager's website www.coolabahcapital.com prior to the commencement of each Trading Day on the Securities Exchange. The NAV per unit may fluctuate each day as the market value of the Class's assets rises or falls. The Responsible Entity's NAV Permitted Discretions Policy provides further information about how the NAV per Unit is calculated.

The Responsible Entity has engaged ICE Data Indices, LLC as its agent to calculate and disseminate an iNAV which will be published on the Investment Manager's website www.coolabahcapital.com throughout the Securities Exchange Trading Day. The iNAV reflects the real time movements in markets and currencies during the Trading Day and, for securities not trading during the Trading Day, listed proxy instruments selected on the basis of correlations with the underlying investments. The proxies and their correlations with underlying instruments are reviewed regularly and updated as required. The Responsible Entity or its appointed agents give no guarantees that the iNAV will be published continuously or that it will be up to date or free from error. To the extent permitted by law, neither the Responsible Entity nor its appointed agent shall be liable to any person who relies on the iNAV. The price at which Units trade on the Securities Exchange may not reflect with the NAV per Unit or the iNAV.

The price at which Units trade on the Securities Exchange, or may be applied for or redeemed with the Responsible Entity, may not reflect with the NAV per Unit or the iNAV. Refer to section 7 'Trading price of Units may differ from NAV per Unit' for further details on this Risk.

Investing through an IDPS

The Responsible Entity has authorised the use of this PDS as disclosure to investors or prospective clients of IDPSs, which provide investors with a menu of investment opportunities.

Investors who invest through an IDPS may rely on the information in this PDS to give a direction to the operator of the IDPS to invest in the Fund on their behalf. The Responsible Entity agrees to provide notice to the operators of the IDPSs promptly of any supplementary or replacement PDS that is issued under the Corporations Act.

Importantly, investors who invest in the Class through an IDPS do not become unitholders of the Fund. In those instances the unitholder of the Fund is the operator of the IDPS. The unitholder's rights set out in this PDS may only be exercised by the operator of the IDPS on behalf of the investor for whom they have acquired the Units.

Investors should read this PDS in conjunction with the offer documents issued by the IDPS Operator. Investors complete the application form provided by the IDPS Operator and receive reports concerning the Fund from their IDPS Operator. Enquiries should be directed to the IDPS Operator.

If you are an Indirect Investor, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator and the terms of the IDPS.

Compulsory withdrawal

The Responsible Entity may redeem some or all of an investor's Units without asking them in accordance with the Constitution or as permitted by law. As an example, this may occur where an investor breaches their obligations to the Responsible Entity (for example, where the Responsible Entity believes that the Units are held in breach of prohibitions contained within the Constitution) or where the Responsible Entity believes that the Units are held in circumstances which might result in a violation of an applicable law or regulation.

Distributions

An investor's share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of Units held by the investor at the end of the distribution period. The Class usually distributes income monthly. Distributions are calculated effective the last day of the distribution period and are normally paid to investors as soon as practicable after the distribution calculation date.

Investors in the Class can indicate a preference to have their distribution:

- reinvested back into the Class; or
- directly credited to their Australian domiciled bank account.

Investors who did not indicate a preference will have their distributions credited to their Australian domiciled AUD bank account. Applications for reinvestment will be taken to be received at the end of the relevant distribution period. Distributions are reinvested at the unit price (which excludes the distribution amount) calculated as at the last day of the distribution period. There is no Buy Spread on distributions that are reinvested.

At the end of a distribution period, the Fund's unit price will typically fall to reflect the amount of any distribution. Because distribution entitlements are calculated over the entire period, the closer you invest to the end of that period, the greater the likelihood that a portion of your investment will be returned to you through the distribution.

In some circumstances, the Constitution may allow for an investor's withdrawal proceeds to be taken to include a component of distributable income.

Indirect Investors should review their IDPS Guide for information on how and when they receive any income distribution.

Under the AMIT rules, investors will be assessed for tax on the income of the Class attributed to them. The Constitution permits the Responsible Entity to reinvest part or all of your distribution and/or accumulate part or all of the Class's income in the Class, in which case, under the AMIT rules, the income of the Class that is attributed to you (and which must be included in your income tax return) will be more than the cash distribution paid and the tax cost base of your Units will increase by the amount that the income of the Class attributed to you exceeds the cash distribution paid. For more details, see the Taxation overview in Section 13.

The Responsible Entity may, in a particular year, retain or accumulate part or all of the income of the Class. The tax cost base of Units will increase to the extent that the income of the Class attributed to investors exceeds the cash distribution paid (and will decrease to the extent that the income of the Class attributed to investors is less than the cash distribution paid). We will send you a tax statement after the end of each financial year detailing the amounts attributed to you to assist in the preparation of your tax return.

Details in relation to each distribution will be published on the announcements platform of the Securities Exchange Operator and the Fund's website at www.coolabahcapital.com. The distribution policy of the Fund is current as at the date of this PDS and may be subject to change from time to time.

5. Managing risk

All investments carry risks. Different investment strategies may carry different levels of risk, depending on the assets acquired under the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks below should be considered in light of your risk profile when deciding whether to invest in the Fund. Your risk profile will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

The Responsible Entity and the Investment Manager do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. Returns are not guaranteed and you may lose money by investing in the Fund. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may change in the future. The structure and administration of the Fund is also subject to change.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial or taxation advice, you should contact a licensed financial adviser and/or taxation adviser.

Counterparty risk

Institutions, such as brokerage firms, banks, and broker-dealers, may enter into transactions with the manager of a fund in relation to the sale and purchase of assets or securities. Such institutions may also be issuers of the securities or bonds in which a fund invests. Bankruptcy, fraud, regulatory sanction or a refusal to complete a transaction at one of these institutions could significantly impair the operational capabilities or the capital position of a fund. While the Responsible Entity uses reasonable efforts to mitigate such risks, there can be no guarantee that transactions between such counterparties will always be honoured. A default on a financial commitment could result in a financial loss to the Fund.

To manage counterparty risks, the Investment Manager monitors the Fund's exposure to all OTC derivative counterparties on a daily basis. In accordance with the Securities Exchange Rules, in the event that the aggregate exposure of the Fund to all OTC derivative counterparties exceeds 10% of NAV, the Responsible Entity will take steps within one Trading Day to acquire further collateral to ensure that the exposure of all OTC Derivatives counterparties is reduced to 10% or less of NAV.

Derivatives risk

The value of a derivative is derived from the value of an underlying asset and can be highly volatile. Changes in the value of derivatives may occur due to a range of factors that include rises or falls in the value of the derivative in line with movements in the value of the underlying asset, potential liquidity of the derivative and counterparty credit risk.

iNAV risk

The iNAV published by the Class is indicative only and might not accurately reflect the underlying value of the Class. As a consequence the Class may be subject to market making risk.

Interest rate risk

This is the risk that changes in interest rates can have a negative impact on certain investment values or returns. Reasons for interest rate changes are many and include variations in inflation, economic activity and Reserve Bank of Australia (RBA)

policies. The Fund aims to minimise any risks associated with the change in interest rates by targeting a floating-rate portfolio with interest-rate duration exposure of less than 3 months.

Investment and credit risk

This is the risk that the value of an individual investment in the Fund may change in value or become more volatile, potentially causing a reduction in the value of the Fund and increasing its volatility. This may be because, amongst many other things, there are changes in government or bank policies, the Investment or Portfolio Manager's operations or management, or business environment, or a change in perceptions of the risk of any investment. Various risks may lead to the issuer of the investment defaulting on its obligations and reducing the value of the investment to which the Fund has an exposure.

Investment manager risk

Investment managers can be wound up or liquidated, they can cease to manage the relevant fund and be replaced, their investment methodology can change, they can poorly manage operational risks and their funds can perform poorly. If any of these occurred, Equity Trustees would do all things reasonably practicable to recover the value of the Fund's investments and seek a new investment manager or program, with a similar investment profile, if thought appropriate. If the investment program changed significantly, you would be given at least 30 days' notice before those changes come into effect. Further, only a small number of investment professionals between the Investment Manager and Portfolio Manager are responsible for managing the Fund and their personal circumstances can change. We aim to reduce this risk by having additional resources available through Equity Trustees as needed.

Leverage risk

Leverage is a key component of the Fund's investment strategy. The exposure of a leveraged portfolio to movements in the instruments and markets in which it invests can be greater than the value of the assets within the portfolio. Therefore, if a leveraged portfolio generates a positive return, the returns will be greater than the returns generated by an equivalent unleveraged portfolio. Similarly, if the investments generate a negative return, the losses will be greater than the losses generated by an equivalent unleveraged portfolio.

At its core the use of leverage is applied against tradeable, investment-grade debt securities, which rank ahead of equities and hybrids in the corporate capital structure. The Portfolio Manager has set leverage limits and other exposure limits to assist with risk management, which is overseen by the Portfolio Manager's independent compliance committee. The Portfolio Manager will monitor the leverage ratio and exposure to OTC Derivative counterparties on a daily basis and make adjustments to ensure maximum leverage is not exceeded. For further information on the Fund's use of leverage, including exposure limits, see "Leverage" under Section 5.

Liquidity of investments risk

Whilst the Fund is exposed to bonds which are generally considered to be liquid investments, under extreme market conditions, there is a risk that such investments cannot be readily converted into cash or at an appropriate price. In such circumstances, the Fund may be unable to liquidate sufficient assets to meet its obligations, including payment of withdrawals, within required timeframes or it may be required to sell assets at a substantial loss in order to do so.

Market making risk

The Responsible Entity acts as market maker in the Units on behalf of the Class and may provide liquidity to investors on the Securities Exchange by acting as a buyer and seller of Units in the Class. There is a risk that the Responsible Entity may not always be able to make a market in times of uncertainty about the value of the portfolio due to its duty to act in the best interests of members. The Class will bear the risk of the market making activities undertaken by the Responsible Entity on the Class's behalf which may result in a profit or loss to the Class and investors. There is a risk that the Class could suffer a material cost as a result of these market making activities which may adversely affect the NAV of the Class and the value of investors' holdings. Such a cost could be caused by either an error in the execution of market making activities or in the price at which Units are transacted on the Securities Exchange. As many overseas share markets in which the Fund invests are closed during the Securities Exchange Trading Day, it is possible that the Fund is not able to execute its preferred hedging strategy. As such, the Fund may bear the next day pricing risk for any net Units it has traded on the Securities Exchange. In order to mitigate this risk, the Responsible Entity has the discretion to increase the spread at which it makes a market and also has the right to cease making a market subject to its obligations under the Securities Exchange Operating Rules. The market making agent has no involvement with hedging transactions placed by the Class.

Market making agent risk

The Responsible Entity has appointed a market making agent to execute the Class's market making activities and provide settlement services. There is a risk that the market making agent could make an error in executing the Class's market making activities. Additionally, the Class may enter into transactions to acquire or to liquidate assets in anticipation of the market making agent fulfilling its settlement processing obligations in a correct and timely manner. If the market making agent does not fulfil its settlement processing obligations in a correct and timely manner, the Class could suffer a loss.

Market risk

This is the risk that an entire market, country or economy (such as Australia) changes in value or becomes more volatile, including the risk that the purchasing power of the currency changes (either through inflation or deflation), potentially causing a reduction in the value of the Fund and increasing its volatility. This may be because, amongst many other things, there are changes in economic, financial, technological, political or legal conditions, natural and manmade disasters, conflicts and changes in market sentiment.

Pandemic and other unforeseen event risk

Health crises, such as pandemic and epidemic diseases, as well as other catastrophes that interrupt the expected course of events, such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have and may in the future have an adverse effect on the economies and financial markets either in specific countries or worldwide and consequently on the value of the Fund's investments. Further, under such circumstances the operations, including functions such as trading and valuation, of the Investment Manager and other service providers could be reduced, delayed, suspended or otherwise disrupted.

Ratings risk

The assets in which the Fund invests may or may not have been assigned credit ratings by independent ratings agencies. A ratings downgrade could significantly reduce the value of an investment and impact the value of the Units of the Fund. Credit ratings do not guarantee the credit quality of a security, its underlying assets, or its repayment, and may be re-assessed by ratings agencies in a range of circumstances. Ratings agencies can make mistakes. The Investment Manager seeks to minimise this risk by assessing the credit risks inherent in any investments it makes.

Securities Exchange liquidity risk

The liquidity of trading in the Units on the Securities Exchange may be limited. This may affect an investor's ability to buy or sell Units. Investors will not be able to purchase or sell Units on the Securities Exchange during any period that the Securities Exchange suspends trading of Units in the Class.

The Class may be removed from quotation by the Securities Exchange Operator or terminated.

The Securities Exchange Operator imposes certain requirements for the continued quotation of securities, such as the Units, on the Securities Exchange. Investors cannot be assured that the Fund will continue to meet the requirements necessary to maintain quotation of the Class on the Securities Exchange. In addition, the Securities Exchange Operator may change the quotation requirements. The Responsible Entity may determine, in accordance with the Constitution and Corporations Act, to terminate the Fund for any reason including if the Class ceases to be quoted on the Securities Exchange. Information about the Securities Exchange Rules applicable to quotation of the Class on the Securities Exchange is set out in Section 9 of this PDS.

Risk measure

The Investment Manager considers that the "standard risk measure" for this Fund is a medium risk rating, which means that the estimated number of negative annual returns over any 20 year period is 2 to less than 3. On a scale of 1 to 7 where 7 is riskiest in this respect, the Fund is in category 4.

The standard risk measure is based on industry guidance to allow investors to compare investment options that are expected to deliver a similar number of negative annual returns over any 20 year period. It is not a complete assessment of all forms of investment risk. For instance, it does not detail what the size of a negative return could be or the potential for a positive return to be less than an investor may require to meet their objectives. Further, it does not take into account the impact of fees and tax on the likelihood of a negative return.

Investors should still ensure they are comfortable with the risks and potential losses associated with the Fund.

Counterparty risk

The Fund is, to a certain extent, reliant on external service providers in connection with the operation of the Fund and investment activities. There is a risk with these arrangements that the other party to a contract (such as a derivatives contract) may fail to perform its contractual obligations either in whole or in part. Returns may be affected if counterparties experience financial difficulty, fail to perform their services or meet their obligations in the manner anticipated by the Fund.

Investment approach risk

There is no guarantee that the investment approach, techniques, or strategies utilised by the Investment Manager on behalf of the Fund will be successful or profitable. All

investments of the Fund risk the loss of capital. As is true of any investment, there is a risk that an investment in the Fund will be lost entirely or in part. Furthermore, there can be no assurance that the specific trading strategies utilised for the Fund will produce profitable results. Any factor that would make it difficult to execute trades, such as reduced liquidity or extreme market developments, also could be detrimental to profits. No assurance can be given that the Investment Manager's techniques and strategies will be profitable.

Distribution risk

No guarantee can be given concerning the distributions made by the Fund, the future earnings of the Fund, the income and capital appreciation of the portfolio or the return of capital invested by investors.

Withdrawal risk

There may be circumstances where your ability to withdraw from the Fund is restricted. This includes (but is not limited to) where market events affect the liquidity of the assets, the Fund is no longer liquid, investor activity has affected the Fund's ability to realise assets at an acceptable price.

Performance risk

There can be no assurance that the Fund will achieve its objectives. Further, the Fund's future performance depends upon a number of factors with the Investment Manager, including its ability to manage the investment strategy, and to grow the funds under management.

Pooled fund risk

The prices available to the Fund when investing new inflows or selling assets to meet withdrawals may differ from the prices used to determine the Fund's NAV per unit. Investors in the Fund may be affected by the transaction activity of other investors entering or exiting the relevant Fund. The extent of this impact will depend on the relative size of inflows or outflows and the volatility of the securities held by the relevant Fund. In addition, inflows and outflows may also affect the taxable income distributed to an investor during a financial year.

Multiple unit class risk

The Fund offers separate classes of units for investment. The classes are not separate legal entities and the assets of each class will not be segregated. Where a Fund offers separate

classes of units, all of the assets of that Fund are available to meet all of its liabilities, regardless of the class to which such assets or liabilities are attributable. In practice, cross-class liability will usually only arise where any separate class becomes insolvent and is unable to meet all of its liabilities. In this case, all of the assets of the relevant Fund attributable to other separate classes may be applied to cover the liabilities of the insolvent classes. If losses or liabilities are sustained by a class in excess of the assets attributable to such class, such excess may be apportioned to the other classes.

Conflicts of interest risk

The Responsible Entity, Investment Manager, their related bodies corporate and various service providers may from time to time act as issuer, investment manager, custodian, unit registry, administrator, broker, distributor or dealer to other parties or funds that have similar objectives to the Fund. It is therefore possible that any of them may have potential conflicts of interest with the Fund. The Responsible Entity and its related bodies corporate may invest in, directly or indirectly, or manage or advise other funds which invest in assets which might also be purchased by the Fund. Neither the Responsible Entity nor its related bodies corporate nor any person connected with it is under any obligation to offer investment opportunities to the Fund. The Responsible Entity maintains a conflict of interest policy to ensure that it manages its obligations to the Fund such that all conflicts (if any) are resolved fairly.

Regulatory risk

The value of some investments may be adversely affected by changes in Australian government policies, regulations and laws, including tax laws and laws affecting registered managed investment schemes. Changes to regulations can affect the Fund's operation (for example changes to taxation rules can affect the Fund's income payments), disclosure (for example new regulations may require different information be reported or disclosed compared to current information), or investment activities (for example new regulations or tax rules may prohibit or restrict practices or activities the Fund relies on).

6. Applications and Withdrawals on the Securities Exchange

Applications

Investors can invest in the Class by buying Units through a broker who will settle the buy order on the CHESSE settlement service. There is no minimum investment amount. The price applied to the investor's buy order will be the market price at the time of purchase as reflected by the price at which they have bought Units on the Securities Exchange.

Withdrawals

Investors can withdraw from the Class by selling Units through a broker who will settle the sell order on the CHESSE settlement service. There is no minimum withdrawal amount. The exit price applied to the investor's sell order will be the market-price as reflected by the price at which they have sold Units on the Securities Exchange.

Securities Exchange liquidity

The Responsible Entity may provide liquidity to investors on the Securities Exchange by acting as a buyer and seller of Units.

At close of each Trading Day, the Responsible Entity will create or cancel units by applying or withdrawing its net position in units transacted via the Securities Exchange. The Responsible Entity has appointed a market making agent to transact and facilitate settlement of trades on its behalf.

The price that the Responsible Entity may transact on will reflect the NAV per unit (as referenced by the iNAV), market conditions and the supply and demand for units during the Trading Day. The Fund bears all the risk of market making activities performed by the Responsible Entity on its behalf. This may result in a gain or loss to the Fund. Please refer to the Market Making Risks in section 5.

7. Keeping track of your investment

Complaints resolution

Equity Trustees has an established complaints handling process and is committed to properly considering and resolving all complaints. If you have a complaint about your investment, please contact us on:

Phone: 1300 133 472
Post: Equity Trustees Limited
GPO Box 2307, Melbourne VIC 3001
Email: compliance@eqt.com.au

We will acknowledge receipt of the complaint within 1 Business Day or as soon as possible after receiving the complaint. We will seek to resolve your complaint as soon as practicable but not more than 30 calendar days after receiving the complaint.

If you are not satisfied with our response to your complaint, you may be able to lodge a complaint with the Australian Financial Complaints Authority ("AFCA").

Contact details are:
Online: www.afca.org.au
Phone: 1800 931 678
Email: info@afca.org.au
Post: GPO Box 3, Melbourne VIC 3001.

The external dispute resolution body is established to assist you in resolving your complaint where you have been unable to do so with us. However, it's important that you contact us first.

Reports

We will make the following statements available to all investors:

- A transaction confirmation statement, showing a change in your unit holding (provided when a transaction occurs or on request).
- The Fund's annual audited accounts for each period ended 30 June.
- Annual distribution, tax and confirmation of holdings statements for each period ended 30 June.
- Annual report detailing each of the following:
 - the actual allocation to each asset type;
 - the liquidity profile of the portfolio assets as at the end of the period;
 - the maturity profile of the liabilities as at the end of the period;
 - the derivative counterparties engaged;
 - the leverage ratio (including leverage embedded in the assets of the Fund, other than listed equities and bonds) as at the end of the period;
 - the returns since inception; and
 - the key service providers if they have changed since the latest report given to investors, including any change in their related party status.

The latest annual report will be available online from www.coolabahcapital.com.

The following information will be available on the Fund's website, www.coolabahcapital.com/coolabah-global-floating-rate-high-yield-fund:

- the current total NAV of the Fund and the withdrawal value of a unit in each class of Units as at the date the NAV was calculated, updated daily;

- the iNAV will be published throughout the Trading Day;
- the full portfolio holdings at least quarterly with a delay of no more than two months;
- the number of individual Units on issue in relation to the last Business Day in that month, published within 5 days of the end of that month;
- Where the total notional value of more than 5% of the Fund's NAV comprises OTC derivatives, the total percentage of notional derivative exposure to the Fund's NAV will be disclosed to the market within 5 Business Days of the end of that month;
- any change to key service providers if they have changed since last report given to investors, disclosed monthly;
- for each of the following matters since the last report on those matters, disclosed monthly:
 - the net return on the Fund's assets after fees, costs and taxes;
 - any material change in the Fund's risk profile;
 - any material change in the Fund's strategy; and
 - any change in the individuals playing a key role in investment decisions for the Fund.

By applying to invest in the Class, you agree that, to the extent permitted by law, any periodic information which is required to be given to you under the Corporations Act or ASIC policy can be given to you by making that information available on Equity Trustees' or the Investment Manager's website.

Please note that Indirect Investors who access the Fund through an IDPS will receive reports directly from the IDPS Operator and not from the Responsible Entity. However, Equity Trustees will be providing the reports described above to relevant IDPS Operators. Indirect Investors should refer to their IDPS Guide for information on the reports they will receive regarding their investment.

Additional disclosure information

If and when the Fund has 100 or more direct investors, it will be classified by the Corporations Act as a 'disclosing entity'. As a disclosing entity the Fund will be subject to regular reporting and disclosure obligations. Investors would have a right to obtain a copy, free of charge, of any of the following documents:

- the most recent annual financial report lodged with ASIC ("Annual Report");
- any subsequent half yearly financial report lodged with ASIC after the lodgment of the Annual Report; and
- any continuous disclosure notices lodged with ASIC after the Annual Report but before the date of this PDS.

Equity Trustees will comply with any continuous disclosure obligation by lodging documents with ASIC as and when required.

Copies of these documents lodged with ASIC in relation to the Fund may be obtained through ASIC's website at www.asic.gov.au.

8. Fees and other costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower fees. Ask the Fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC) Moneysmart website** (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

Fees and other costs

This section shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole.

Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment.

Fees and Costs Summary

Coolabah Global Floating- Rate High Yield Complex ETF		
Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs¹		
<i>Management fees and costs</i> The fees and costs for managing your investment	1.00% of the NAV of the Class	The management fees component of management fees and costs are accrued daily and paid from the Class monthly in arrears and reflected in the unit price. Otherwise, the fees and costs are variable and deducted and reflected in the unit price of the Class as they are incurred. The management fees component of management fees and costs can be negotiated. Please see "Differential fees" in the "Additional Explanation of Fees and Costs" for further information.
<i>Performance fees</i> Amounts deducted from your investment in relation to the performance of the product	Not applicable	Not applicable
<i>Transaction costs</i> The costs incurred by the scheme when buying or selling assets	0.03% of the NAV of the Class	Transaction costs are variable and deducted from the Class as they are incurred and reflected in the unit price. They are disclosed net of amounts recovered by the Buy/Sell Spread.
Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)		
<i>Establishment fee</i> The fee to open your investment	Not applicable	Not applicable
<i>Contribution fee</i> The fee on each amount contributed to your investment	Not applicable	Not applicable

Coolabah Global Floating- Rate High Yield Complex ETF

<p><i>Buy-sell spread</i></p> <p>An amount deducted from your investment representing costs incurred in transactions by the scheme</p>	<ul style="list-style-type: none"> Buying units on the Securities Exchange: Determined by market participants. 	<p>These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Fund and are not separately charged to the investor. The Buy Spread is paid into the Fund as part of an application and the Sell Spread is left in the Fund as part of a redemption.</p>
<p><i>Withdrawal fee</i></p> <p>The fee on each amount you take out of your investment</p>	Not applicable	Not applicable
<p><i>Exit fee</i></p> <p>The fee to close your investment</p>	Not applicable	Not applicable
<p><i>Switching fee</i></p> <p>The fee for changing investment options</p>	Not applicable	Not applicable

¹ All fees quoted above are inclusive of Goods and Services Tax (GST) and net of any Reduced Input Tax Credits (RITC). See below for more details as to how management costs are calculated.

Additional Explanation of fees and costs

What do the management costs pay for?

The management fees and costs include amounts payable for administering and operating the Class, investing the assets of the Class, expenses and reimbursements in relation to the Class and indirect costs if applicable.

Management fees and costs do not include performance fees or transaction costs, which are disclosed separately.

The management fees component of management fees and costs of 1.00% p.a. of the NAV of the Class is payable to the Responsible Entity of the Fund for managing the assets and overseeing the operations of the Class. The management fees component is accrued daily and paid from the Class monthly in arrears and reflected in the unit price. As at the date of this PDS, the management fees component covers certain ordinary expenses such as Responsible Entity fees, investment management fees, custodian fees, and administration and audit fees.

The indirect costs and other expenses component of 0.00% p.a. of the NAV of the Class may include other ordinary expenses of operating the Class, as well as management fees and costs (if any) arising from interposed vehicles in or through which the Class invests in. The indirect costs and other expenses component is variable and reflected in the unit price of the Class as the relevant fees and costs are incurred. They are borne by investors, but they are not paid to the Responsible Entity or Investment Manager. The indirect costs and other expenses component is based on the relevant costs incurred during the financial year ended 30 June 2025.

The costs associated with holding derivatives for the primary purpose of avoiding or limiting the financial consequences of fluctuations in, or in the value of, receipts or costs of the Class (particularly to hedge against foreign exchange movements related to financial products issued overseas) are not indirect costs, and are disclosed as transaction costs. Refer to "transaction costs" below.

Actual indirect costs for the current and future years may differ. If in future there is an increase to indirect costs disclosed in this PDS, updates will be provided on Equity Trustees' website at www.eqt.com.au/insto where they are not otherwise required to be disclosed to investors under law.

Transaction costs

In managing the assets of the Class, the Class may incur transaction costs such as brokerage, buy-sell spreads in respect of the underlying investments of the Class, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold, and the costs of over-the-counter derivatives that reflect transaction costs that would arise if the Class held the ultimate reference assets, as well as the costs of over-the-counter derivatives used for hedging purposes. Transaction costs also include costs incurred by interposed vehicles in which the Class invests (if any), that would have been transaction costs if they had been incurred by the Class itself. Transaction costs are an additional cost to the investor where they are not recovered by the Buy/Sell Spread (if applicable), and are generally incurred when the assets of the Class are changed in connection with day-to-day trading or when there are applications or withdrawals which cause net cash flows into or out of the Class.

The Buy/Sell Spread that is disclosed in the Fees and Costs Summary is a reasonable estimate of transaction costs that the Class will incur when buying or selling assets of the Class. These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Class and are not separately charged to the investor. The Buy Spread is paid into the Class as part of an application and the Sell Spread is left in the Class as part of a redemption and not paid to Equity Trustees or the Investment Manager. The estimated Buy/Sell Spread is nil upon entry and nil upon exit. The dollar value of these costs based on an application or a withdrawal of \$1,000 is \$0 (application) and \$0 (withdrawal) for each individual transaction. The Buy/Sell Spread can be altered by the Responsible Entity at any time and www.coolabahcapital.com will be updated as soon as practicable to reflect any change. The Responsible Entity may also waive the Buy/Sell Spread in part or in full at its discretion. The transaction costs figure in the Fees and Costs Summary is shown net of any amount recovered by the Buy/Sell Spread charged by the Responsible Entity.

Transaction costs generally arise through the day-to-day trading of the Class's assets and are reflected in the Class's unit price as an additional cost to the investor, as and when they are incurred. The gross transaction costs for the Class are 0.03% p.a. of the NAV of the Class, which is based on the relevant costs incurred during the financial year ended 30 June 2025.

However, actual transaction costs for future years may differ.

Stockbroker fees for investors

Investors will incur customary brokerage fees and commissions when buying and selling the Units on the Securities Exchange. Investors should consult their stockbroker for more information in relation to their fees and charges.

Can the fees change?

Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. The current maximum management fee to which Equity Trustees is entitled is 4% of the GAV of the Class. However, Equity Trustees does not intend to charge that amount and will generally provide investors with at least 30 days' notice of any proposed increase to the management fees component of management fees and costs. In most circumstances, the Constitution defines the maximum level that can be charged for fees described in this PDS (other than expenses and reimbursements in relation to the Fund). Equity Trustees also has the right to recover all reasonable expenses incurred in relation to the proper performance of its duties in managing the Fund and as such these expenses may increase or decrease accordingly, without notice.

Payments to IDPS Operators

Subject to the law, annual payments may be made to some IDPS Operators because they offer the Class on their investment menus. Product access is paid by the Investment Manager out of its investment management fee and is not an additional cost to the investor.

Differential fees

The Investment Manager may from time to time negotiate a different fee arrangement (by way of a rebate or waiver of fees) with certain investors who are Australian Wholesale Clients. Please contact the Investment Manager on 1300 901 711 for further information.

Taxation

Please refer to Section 10 of the Product Disclosure Statement for further information on taxation.

Example of annual fees and costs for an investment option

This table gives an example of how the ongoing annual fees and costs in the investment option for this product can affect your investment over a 1-year period. You should use this table to compare this product with other products offered by managed investment schemes.

EXAMPLE – Coolabah Global Floating- Rate High Yield Complex ETF		
BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR		
Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus Management fees and costs	1.00% p.a.	And , for every \$50,000 you have in the Coolabah Global Floating- Rate High Yield Complex ETF you will be charged or have deducted from your investment \$500 each year
Plus Performance fees	Not applicable	And , you will be charged or have deducted from your investment \$0 in performance fees each year
Plus Transaction costs	0.03% p.a.	And , you will be charged or have deducted from your investment \$15 in transaction costs
Equals Cost of Coolabah Global Floating- Rate High Yield Complex ETF		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of: \$515* What it costs you will depend on the investment option you choose and the fees you negotiate.

* Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the Buy/Sell Spread.

This example assumes the \$5,000 contribution occurs at the end of the first year, therefore the fees and costs are calculated using the \$50,000 balance only.

Warning: If you have consulted a financial adviser, you may pay additional fees. You should refer to the Statement of Advice or Financial Services Guide provided by your financial adviser in which details of the fees are set out.

ASIC provides a fee calculator on www.moneysmart.gov.au, which you may use to calculate the effects of fees and costs on account balances. The indirect costs and other expenses component of management fees and costs and transaction costs may also be based on estimates. As a result, the total fees and costs that you are charged may differ from the figures shown in the table.

9. About the Securities Exchange and CHESS

Cboe Operating Rules Framework

An application has been made to Cboe Australia (“Securities Exchange Operator” or “Cboe”) for the Class to be admitted for trading status on the market (“Securities Exchange”) operated by Cboe under the Cboe Operating Rules (“Securities Exchange Rules”). The Securities Exchange Rules are accessible at www.cboe.com.au.

As at the date of this PDS, the Class is not yet quoted on the Securities Exchange.

The following table sets out the key differences between the ASX Listing Rules and the Securities Exchange Rules.

Requirement	ASX Listing Rules	Securities Exchange Rules
Control	<p>An issuer controls the value of its own securities and the business it runs.</p> <p>The value of those securities is directly influenced by the equity issuer’s performance and conduct. e.g. the management and board generally control the fate of the business and, therefore, have direct influence over the share price.</p>	<p>An issuer of a product quoted under the Securities Exchange Rules does not control the value of the assets underlying its product. It offers a product that gives investors exposure to underlying assets – such as shares, bonds, indices, currencies or commodities.</p> <p>The value (price) of products quoted under the Securities Exchange Rules is dependent on the performance of the underlying assets rather than the financial performance of the issuer itself e.g. a managed fund issuer does not control the value of the shares it invests in.</p>
Continuous disclosure	<p>Issuers are subject to continuous disclosure requirements under ASX Listing Rule 3.1 and section 674 of the Corporations Act.</p>	<p>Issuers of products quoted under the Securities Exchange Rules are not subject to the continuous disclosure requirements in ASX Listing Rule 3.1 and section 674 of the Corporations Act.</p> <p>However, the Securities Exchange Rules requires that an issuer of a product quoted under the Securities Exchange Rules must provide to the Securities Exchange with any information that is not generally available and which may lead to a false market in that product or would otherwise impact on its price. In addition, issuers of products quoted under the Securities Exchange Rules must disclose information about:</p> <ul style="list-style-type: none"> • information about the NAV of the Class’s underlying investments daily; • information about withdrawals from the Class; • information about distributions paid in relation to the Class; • any other information that is required to be disclosed to ASIC under s675, s1017B or would be required under s323DA of the Corporations Act if the product was listed, must be disclosed to Cboe via the Cboe market announcement platform at the same time it is disclosed to ASIC; and • immediately disclose the NAV whenever the activities of the Investment Manager or Portfolio Manager cause the NAV to move by more than 10% since the last reported NAV.

<p>Periodic disclosure</p>	<p>Issuers are required to disclose half-yearly and annual financial information and reports to the ASX announcements platform.</p>	<p>Issuers of products quoted under the Securities Exchange Rules are not required to disclose their half yearly and annual financial information or annual reports.</p> <p>Issuers of products quoted under the Securities Exchange Rules that are registered managed investment schemes are, however, still required to lodge financial reports for those managed investment schemes with the Securities Exchange at the same time as they are provided to ASIC and investors. As at the date of this PDS, Equity Trustees as an issuer of a product quoted under the Securities Exchange Rules is required to disclose:</p> <ul style="list-style-type: none"> • within 5 Business Days of the end of each month, the total number of individual Units on issue on the last Business Day of that month; and • in the case where the Fund's aggregate notional exposure to all OTC derivatives is greater than 5% of the Fund's NAV, within 5 Business Days of the end of each month: <ul style="list-style-type: none"> • the exposure of the Fund to all OTC derivative counterparties as a percentage of the NAV of the Fund; and • the value of the assets (excluding the value of OTC derivatives, but inclusive of collateral) held by the Fund as a percentage of the NAV of the Fund.
<p>Corporate control</p>	<p>Listed companies and listed managed investment schemes are subject to notification requirements under the Corporations Act and the ASX Listing Rules relating to takeover bids, buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings.</p>	<p>Certain requirements in the Corporations Act and the ASX Listing Rules in relation to matters such as takeover bids, buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings that apply to companies and listed schemes do not apply to products quoted under the Securities Exchange Rules.</p> <p>Section 601FM of the Corporations Act continues to apply in relation to the removal of a responsible entity by extraordinary resolution by the members entitled to vote.</p>
<p>Related Party transactions</p>	<p>Chapter 10 of the ASX Listing Rules relates to transactions between an entity and a person in a position to influence the entity and sets out controls over related party transactions.</p>	<p>Chapter 10 of the ASX Listing Rules does not apply to products quoted under the Securities Exchange Rules.</p> <p>The Responsible Entity will still be required to comply with the related party requirements in Part 5C.7 and Chapter 2E of the Corporations Act.</p>

Auditor rotation obligations

Division 5 of Part 2M.4 of the Corporations Act imposes specific rotation obligations on auditors of listed companies and listed managed investment schemes.

Issuers of products quoted under the Securities Exchange Rules are not subject to the auditor rotation requirements in Division 5 of Part 2M.4 of the Corporations Act.

An auditor will be appointed by the Responsible Entity to audit the financial statements and Compliance Plan of the Fund under section 601HG of the Corporations Act.

About CHES

The Responsible Entity participates in the Clearing House Electronic Sub-register System ("CHES"). CHES is a fast and economical clearing and settlement facility which also provides an electronic sub-register service. The Unit registry has established and will maintain an electronic sub-register with CHES on behalf of the Responsible Entity. The Responsible Entity will not issue investors with certificates in respect of their Units. Instead, when investors purchase Units on the Securities Exchange they will receive a holding statement from the Unit registry which will set out the number of Units they hold. The holding statement will specify the "Holder Identification Number" or "Shareholder Reference Number" allocated by CHES. Subject to the Securities Exchange Rules, the Responsible Entity may decline to register a purchaser of a Unit or Units.

10. Taxation

Taxation

The following information summarises some of the Australian taxation issues you may wish to consider before making an investment in the Fund and assumes that you hold your investment in the Fund on capital account and are not considered to be carrying on a business of investing, trading in investments or investing for the purpose of profit making by sale. The information should be used as a guide only and does not constitute professional tax advice as individual circumstances may differ.

It is recommended that investors seek their own professional advice, specific to their own circumstances, of the taxation implications of investing in the Fund.

General

The Fund is an Australian resident trust for Australian tax purposes. Therefore, the Fund is required to determine its net income (taxable income) for the year of income. On the basis that investors are presently entitled (which is the intention of Equity Trustees) to the net income of the Fund (including net taxable capital gains) or will be attributed their share of assessable income, exempt income, non-assessable non-exempt income and tax offsets (i.e. credits) of the Fund and the Fund is not a public trading trust, the Fund should be treated as a flow-through trust for tax purposes. This means that investors should be taxed on their share of the Fund's net taxable income or the amount attributed to them, and the Fund should generally not be liable to pay Australian income tax.

In the case where the Fund makes a loss for Australian tax purposes, the Fund cannot distribute the tax loss to investors. However, the tax loss may be carried forward by the Fund for offset against taxable income of the Fund in subsequent years, subject to the operation of the trust loss rules.

Attribution Managed Investment Trust ("AMIT") – core rules

The Fund may qualify as an Attribution Managed Investment Trust (AMIT), and if so, intends to elect into the AMIT regime. The AMIT legislation applies an attribution model whereby Equity Trustees as the Responsible Entity of the Fund attributes amounts of trust components of a particular character to investors on a fair and reasonable basis consistent with the operation of the Fund's Constitution, which includes provisions in relation to AMIT. Under the AMIT rules, the following will apply:

Fair and reasonable attribution Each year, the Fund's determined trust components of assessable income, exempt income, non-assessable non-exempt income and tax offsets (i.e. credits) will be allocated to investors on a "fair and reasonable" attribution basis.

Unders or overs adjustments: Where the Fund's determined trust components for a year are revised in a subsequent year (e.g. due to actual amounts differing to the estimates of income, gains / losses or expenses), unders and overs may arise. Unders and overs will generally be carried forward and adjusted in the year of discovery.

Tax statements: The Responsible Entity will provide an AMIT Member Annual ("AMMA") Statement to Unitholders for the income year with details of the amounts attributed to the Unitholder (known as "determined member components").

Cost base adjustments: Where the distribution made is less than (or more than) certain components attributed to investors, then the cost base of an investor's units may be increased (or decreased). Details of cost base adjustments will be included on an investor's AMMA statement.

Large withdrawals: In certain circumstances, gains may be attributed to a specific investor, for example, gains on disposal of assets to fund a large withdrawal being attributed to the redeeming investor.

Penalties: In certain circumstances (e.g. failure to comply with certain AMIT rules), specific penalties may be imposed.

The AMIT rules are intended to reduce complexity, increase certainty and reduce compliance costs for managed investment trusts and their investors. Where the Fund does not elect into the AMIT regime, or has made the election but the election is not effective for the income year (e.g. the Fund does not satisfy the requirements to be a managed investment trust for the income year), the Tax Law applicable to non-AMITs should be relevant. In particular, the Fund should not generally pay tax on behalf of its investors and instead, investors should be assessed for tax on any income and capital gains generated by the Fund to which they become presently entitled.

Deemed Capital Gains Tax ("CGT") Election

Eligible managed investment trusts ("MITs") may make an election to apply a deemed capital account treatment for gains and losses on disposal of certain eligible investments (including equities and units in other trusts but excluding debt securities and similar instruments). Where the election is made the Fund should hold its eligible investments on capital account and gains/(losses) from the disposal of eligible investments should be treated as capital gains/(losses). Capital gains arising on the disposal of eligible investments held for 12 months or greater may be eligible to be treated as discount capital gains.

Where the CGT election is not made, the Fund should hold its eligible investments on revenue account and gains/(losses) from the disposal of eligible investments should be treated as revenue gains or losses.

Controlled Foreign Company ("CFC") Provisions

There are certain tax rules (i.e. the CFC provisions) which may result in assessable income arising in the Fund in relation to investments in foreign equities, where certain control thresholds are met. If such interests were to be held at the end of the income year, the taxable income of the Fund may include a share of net income and gains (i.e. CFC attributable income) from such investments.

Taxation of Financial Arrangements ("TOFA")

The TOFA rules may apply to certain "financial arrangements" held by the Fund. In broad terms, the TOFA regime seeks to recognise "sufficiently certain" returns on certain financial arrangements on an accruals basis for tax purposes rather than on a realisation basis.

Taxation Reform

The tax information included in this PDS is based on the taxation legislation and administrative practice as at the issue date of this PDS, together with proposed changes to the taxation legislation as announced by the Government. However, the Australian tax system is in a continuing state of reform, and based on the Government's reform agenda, it is likely to escalate rather than diminish. Any reform of a tax system creates uncertainty as to the full extent of announced reforms, or uncertainty as to the meaning of new law that is enacted pending interpretation through the judicial process. These reforms may impact on the tax position of the Fund and its investors. Accordingly, it will be necessary to closely monitor the progress of these reforms, and investors should seek their own professional advice, specific to their own circumstances, of the taxation implications of investing in the Fund.

Tax File Number (“TFN”) and Australian Business Number (“ABN”)

It is not compulsory for an investor to quote their TFN or ABN. If an investor is making this investment in the course of a business or enterprise, the investor may quote an ABN instead of a TFN. Failure by an investor to quote an ABN or TFN or claim an exemption may cause the Responsible Entity to withhold tax at the top marginal rate, plus the Medicare Levy, on gross payments including distributions or attribution of income to the investor. The investor may be able to claim a credit in their tax return for any TFN or ABN tax withheld. Collection of TFNs is permitted under taxation and privacy legislation.

By quoting their TFN or ABN, the investor authorises Equity Trustees to apply it in respect of all the investor’s investments with Equity Trustees. If the investor does not want to quote their TFN or ABN for some investments, Equity Trustees should be advised.

GST

The Fund is registered for GST. The issue or withdrawal of units in the Fund and receipt of distributions are not subject to GST.

The Fund may be required to pay GST included in management and other fees, charges, costs and expenses incurred by the Fund. However, to the extent permissible, the Responsible Entity will claim on behalf of the Fund a proportion of this GST as a reduced input tax credit (“RITC”) or input tax credit (“ITC”). Unless otherwise stated, fees and charges quoted in this PDS are inclusive of GST and take into account any available RITCs. The Fund may be entitled to as yet undetermined additional ITCs on the fees, charges or costs incurred. If the Responsible Entity is unable to claim RITCs or ITCs on behalf of the Fund, the remaining GST will be a cost to the Fund.

The impact of GST payments and credits will be reflected in the unit price of the Fund. Investors should seek professional advice with respect to the GST consequences arising from their unit holding.

Australian Taxation of Australian Resident Investors

Distributions

For each year of income, each Australian resident investor will be required to include within their own tax calculations and tax return filings the assessable income, exempt income, non-assessable non-exempt income and tax offsets (i.e. credits) of the Fund attributed to them by Equity Trustees as the Responsible Entity of the Fund.

The tax consequences for investors in the Fund depends on the tax components of assessable income, exempt income, non-assessable non-exempt income and tax offsets (i.e. credits) of the Fund attributed to them.

Investors will receive an Annual Tax Statement (or an “AMMA” for an AMIT) detailing all relevant taxation information concerning attributed amounts and cash distributions, including any Foreign Income Tax Offset (“FITO”) and franking credit entitlements, returns of capital, assessable income, and any downwards cost base adjustment in the capital gains tax cost base of their units in the Fund (or potentially upwards cost base adjustments in the capital gains tax cost base of their units in the case of an AMIT).

An investor may receive their share of attributed tax components of the Fund or net income in respect of distributions made during the year or where they have made a large withdrawal from the Fund, in which case their withdrawal proceeds may include their share of net income or attributed tax components of assessable income, exempt income, non-assessable non-exempt income and tax offsets (i.e. credits). In addition, because Australian investors can move into and out

of the Fund at different points in time, there is the risk that taxation liabilities in respect of gains that have benefited past investors may have to be met by subsequent investors.

Foreign Income

The Fund may derive foreign source income that is subject to tax overseas, for example withholding tax. Australian resident investors should include their share of both the foreign income and the amount of the foreign tax withheld in their assessable income. In such circumstances, investors may be entitled to a FITO for the foreign tax paid, against the Australian tax payable on the foreign source income. To the extent the investors do not have sufficient overall foreign source income to utilise all of the FITOs relevant to a particular year of income, the excess FITOs cannot be carried forward to a future income year.

Disposal of Units by Australian Resident Investors

If an Australian resident investor transfers or redeems their units in the Fund, this may constitute a disposal for tax purposes depending on their specific circumstances.

Where an investor holds their units in the Fund on capital account, a capital gain or loss may arise on disposal and each investor should calculate their capital gain or loss according to their own particular facts and circumstances. As noted above, proceeds on disposal may include a component of distributable income. Generally, in calculating the taxable amount of a capital gain, a discount of 50% for individuals and trusts or 33 & 1/3% for complying Australian superannuation funds may be allowed where the units in the Fund have been held for 12 months or more. No CGT discount is available to corporate investors.

Any capital losses arising from the disposal of the investment may be used to offset other capital gains the investor may have derived. Net capital losses may be carried forward for offset against capital gains of subsequent years but may not be offset against ordinary income.

Australian Taxation of Non-Resident Investors

Tax on Income

The Fund expects to derive income which may be subject to Australian withholding tax when attributed by Equity Trustees as the Responsible Entity of the Fund to non-resident investors.

Australian withholding tax may be withheld from distributions of Australian source income and gains attributed to a non-resident investor. The various components of the net income of the Fund which may be regarded as having an Australian source include Australian sourced interest, Australian sourced other gains, Australian sourced dividends and CGT taxable Australian property.

We recommend that non-resident investors seek independent tax advice before investing, taking into account their particular circumstances and the provisions of any relevant Double Taxation Agreement/Exchange of Information Agreement (“EOI”) between Australia and their country of residence.

Disposal of Units by Non-Resident Investors

Based on the Fund’s investment profile, generally non-resident investors holding their units on capital account should not be subject to Australian capital gains tax on the disposal of units in the Fund unless the units were capital assets held by the investor in carrying on a business through a permanent establishment in Australia. Australian tax may apply in certain circumstances if the non-resident holds their units on revenue account. CGT may also apply in some cases where the Fund has a direct or indirect interest in Australian real property. We recommend that non-resident investors seek independent tax advice in relation to the tax consequences of the disposal of their units.

11. Other important information

Cooling off period

Investors do not have cooling-off rights in respect of Units in the Class, however a complaints handling process has been established.

Securities Exchange conditions of admission

As part of the Fund's conditions of admission to the Securities Exchange under the Securities Exchange Rules, the Responsible Entity has agreed to:

- disclose the Fund's portfolio holdings on a quarterly basis within two months of the end of each calendar quarter;
- make available half year and annual financial reports, distribution information and other required disclosures on the Cboe announcements platform;
- provide the iNAV as described in this PDS; and
- provide a daily pricing basket of securities and bonds as a proxy for the portfolio holdings.

Consent

The Investment Manager, Portfolio Manager, Administrator and the Custodian have given and, as at the date of this PDS, have not withdrawn:

- written consent to be named in this PDS as the Investment Manager, Portfolio Manager, Administrator and Custodian respectively of the Fund; and
- written consent to the inclusion of the statements made about them which are specifically attributed to them, in the form and context in which they appear.

The Investment Manager and the Custodian have not otherwise been involved in the preparation of this PDS or caused or otherwise authorised the issue of this PDS. Neither the Investment Manager, the Custodian nor their employees or officers accept any responsibility arising in any way for errors or omissions, other than those statements for which it has provided its written consent to Equity Trustees for inclusion in this PDS.

Constitution of the Fund

You will be issued units in the Class when you invest. Subject to the rights, obligations and restrictions of a class, each unit represents an equal undivided fractional beneficial interest in the assets of the Class as a whole subject to liabilities, but does not give you an interest in any particular property of the Class or the Fund.

Equity Trustees' responsibilities and obligations, as the responsible entity of the Fund, are governed by the Constitution as well as the Corporations Act and general trust law. The Constitution contains a number of provisions relating to the rights, terms, conditions and obligations imposed on both Equity Trustees, as the responsible entity of the Fund, and investors. Some of the provisions of the Constitution are discussed elsewhere in this PDS.

Other provisions relate to an investor's rights under the Constitution, and include:

- an investor's right to share in any Fund income, and how we calculate it;
- what you are entitled to receive when you withdraw or if the Fund is wound up;
- an investor's right to withdraw from the Fund - subject to the times when we can cease processing withdrawals, such as if the Fund becomes 'illiquid';
- the nature of the Units - identical rights attach to all Units within a class; and
- an investor's rights to attend and vote at meetings – these provisions are mainly contained in the Corporations Act.

There are also provisions governing our powers and duties, including:

- how we calculate unit prices, the maximum amount of fees we can charge and expenses we can recover;
- when we can amend the Constitution - generally we can only amend the Constitution where we reasonably believe that the changes will not adversely affect investors' rights. Otherwise, the Constitution can only be amended if approved at a meeting of investors. To the extent that any contract or obligation arises in connection with the acceptance by Equity Trustees of an application or reliance on this PDS by an investor, any amendment to the Constitution may vary or cancel that contract or obligation. Further, that contract or obligation may be varied or cancelled by a deed executed by Equity Trustees with the approval of a special resolution of investors, or without that approval if Equity Trustees considers the variation or cancellation will not materially and adversely affect investor's rights;
- when we can retire as the Responsible Entity of the Fund - which is as permitted by law;
- when we can be removed as the Responsible Entity of the Fund - which is when required by law; and
- our broad powers to invest, borrow and generally manage the Fund.

The Constitution also deals with our liabilities in relation to the Fund and when we can be reimbursed out of the Fund's assets.

For example:

- subject to the Corporations Act we are not liable for acting in reliance and good faith on professional advice;
- subject to the Corporations Act we are not liable for any loss (provided we act in good faith and without negligence); and
- we can be reimbursed for any liabilities we incur in connection with the proper performance of our powers and duties in respect of the Fund.

As mentioned above, Equity Trustees' responsibilities and obligations as the Responsible Entity of the Fund are governed by the Constitution of the Fund, the Corporations Act and general trust law, which require that we:

- act in the best interests of investors and, if there is a conflict between investors' interests and our own, give priority to investors;
- ensure the property of the Fund is clearly identified, held separately from other funds and our assets, and is valued regularly;
- ensure payments from the Fund's property are made in accordance with the Constitution and the Corporations Act; and
- report to ASIC any breach of the Corporations Act in relation to the Fund which has had, or is likely to have, a materially adverse effect on investors' interests as well as other significant breaches required by law. Copies of the Constitution are available, free of charge, on request from Equity Trustees.

A copy of the Constitution of the Fund is available, free of charge, on request from Equity Trustees.

Termination of the Fund

The Responsible Entity may resolve at any time to terminate and liquidate the Fund (if it provides investors with notice) in accordance with the Constitution and the Corporations Act. Upon termination and after conversion of the assets of the Fund into cash and payment of, or provision for, all costs, expenses

and liabilities (actual and anticipated), the net proceeds will be distributed pro-rata among all investors according to the aggregate of the Withdrawal Price for each of the Units they hold in the Class.

Our legal relationship with you

Equity Trustees' responsibilities and obligations, as the Responsible Entity of the Fund, are governed by the Constitution of the Fund, as well as the Corporations Act and general trust law. The Constitution of the Fund contains a number of provisions relating to the rights, terms, conditions and obligations imposed on both Equity Trustees, as the Responsible Entity of the Fund, and investors. Equity Trustees may amend the Constitution if it considers that the amendment will not adversely affect investors' rights. Otherwise, the Constitution may be amended by way of a special resolution of investors. To the extent that any contract or obligation arises in connection with the acceptance by Equity Trustees of an application or reliance on this PDS by an investor, any amendment to the Constitution may vary or cancel that contract or obligation. Further, that contract or obligation may be varied or cancelled by a deed executed by Equity Trustees with the approval of a special resolution of investors, or without that approval if Equity Trustees considers the variation or cancellation will not materially and adversely affect investor's rights. A copy of the Constitution of the Fund is available, free of charge, on request from Equity Trustees.

Compliance plan

Equity Trustees has prepared and lodged a compliance plan for the Fund with ASIC. The compliance plan describes the procedures used by Equity Trustees to comply with the Corporations Act and the Constitution of the Fund. Each year the compliance plan for the Fund is audited and the audit report is lodged with ASIC.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating unit prices (including determining the value of assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy (such as records of any discretions which are outside the scope of, or inconsistent with, the unit pricing policy) will be made available to investors free of charge on request.

Indirect Investors

You may be able to invest indirectly in the Fund via an IDPS by directing the IDPS Operator to acquire Units on your behalf. If you do so, you will need to complete the relevant forms provided by the IDPS Operator. This will mean that you are an Indirect Investor in the Fund and not an investor or member of the Fund. Indirect Investors do not acquire the rights of an investor as such rights are acquired by the IDPS Operator who may exercise, or decline to exercise, these rights on your behalf.

Indirect Investors do not receive reports or statements from us and the IDPS Operator's application and withdrawal conditions determine when you can direct the IDPS Operator to apply or redeem. Your rights as an Indirect Investor should be set out in the IDPS Guide or other disclosure document issued by the IDPS Operator.

Indemnity

Equity Trustees, as the Responsible Entity of the Fund, is indemnified out of the Fund against all liabilities incurred by it in properly performing or exercising any of its powers or duties in relation to the Fund. To the extent permitted by the Corporations Act, this indemnity includes any liability incurred as a result of any act or omission of a delegate or agent

appointed by the Responsible Entity. Subject to the law, Equity Trustees may retain or pay out from the assets of the Fund any sum necessary to affect such an indemnity.

Anti-Money Laundering and Counter Terrorism Financing ("AML/CTF")

Australia's AML/CTF laws require Equity Trustees to adopt and maintain a written AML/CTF Program. A fundamental part of the AML/CTF Program is that Equity Trustees must hold up-to-date information about investors (including beneficial owner information) in the Fund.

To meet this legal requirement, we need to collect certain identification information (including beneficial owner information) and documentation ("KYC Documents") from new investors. Existing investors may also be asked to provide KYC Documents as part of an ongoing customer due diligence/verification process to comply with AML/CTF laws. If applicants or investors do not provide the applicable KYC Documents when requested, Equity Trustees may be unable to process an application, or may be unable to provide products or services to existing investors until such time as the information is provided.

In order to comply with AML/CTF Laws, Equity Trustees may also disclose information including your personal information that it holds about the applicant, an investor, or any beneficial owner, to its related bodies corporate or service providers, or relevant regulators of AML/CTF Laws (whether inside or outside Australia). Equity Trustees may be prohibited by law from informing applicants or investors that such reporting has occurred.

Equity Trustees and the Investment Manager shall not be liable to applicants or investors for any loss you may suffer because of compliance with the AML/CTF laws.

Foreign Account Tax Compliance Act ("FATCA")

In April 2014, the Australian Government signed an intergovernmental agreement ("IGA") with the United States of America ("U.S."), which requires all Australian financial institutions to comply with the FATCA regime.

Under FATCA, Australian financial institutions are required to collect and review their information to identify account holders that are U.S. residents and U.S. controlling persons that invest indirectly through certain passive entities. The information of such account holders is reported to the ATO. The ATO may then pass that information onto the U.S. Internal Revenue Service.

In order to comply with the FATCA obligations, we may request certain information from you. Failure to comply with FATCA obligations may result in the Fund, to the extent relevant, being subject to a 30% withholding tax on payment of U.S. income or gross proceeds from the sale of certain U.S. investments. If the Fund suffers any amount of FATCA withholding and is unable to obtain a refund for the amounts withheld, we will not be required to compensate investors for any such withholding and the effect of the amounts withheld will be reflected in the returns of the Fund.

Common Reporting Standard ("CRS")

The CRS is developed by the Organisation of Economic Co-operation and Development and requires certain financial institutions resident in a participating jurisdiction to document and identify reportable accounts and implement due diligence procedures. These financial institutions will also be required to report certain information on reportable accounts to their relevant local tax authorities.

Australia signed the CRS Multilateral Competent Authority Agreement and has enacted provisions within the domestic tax legislation to implement CRS in Australia. Australian financial institutions need to document and identify reportable accounts,

implement due diligence procedures and report certain information with respect to reportable accounts to the ATO. The ATO may then exchange this information with foreign tax authorities in the relevant signatory countries.

In order to comply with the CRS obligations, we may request certain information from you. Unlike FATCA, there is no withholding tax that is applicable under CRS.

Your privacy

The Australian Privacy Principles contained in the Privacy Act 1988 (Cth) ("Privacy Act") regulate the way in which we collect, use, disclose, and otherwise handle your personal information. Equity Trustees is committed to respecting and protecting the privacy of your personal information, and our Privacy Policy details how we do this.

It is important to be aware that, in order to provide our products and services to you, Equity Trustees may need to collect personal information about you and any other individuals associated with the product or service offering. In addition to practical reasons, this is necessary to ensure compliance with our legal and regulatory obligations (including under the Corporations Act, the AML/CTF Act and taxation legislation). If you do not provide the information requested, we may not be able to process your application, administer, manage, invest, pay or transfer your investment(s).

You must therefore ensure that any personal information you provide to Equity Trustees is true and correct in every detail. If any of this personal information (including your contact details) changes, you must promptly advise us of the changes in writing. While we will generally collect your personal information from you, your broker or adviser or the Investment Manager and Administrator directly, we may also obtain or confirm information about you from publicly available sources in order to meet regulatory obligations.

In terms of how we deal with your personal information, Equity Trustees will use it for the purpose of providing you with our products and services and complying with our regulatory obligations. Equity Trustees may also disclose it to other members of our corporate group, or to third parties who we work with or engage for these same purposes. Such third parties may be situated in Australia or offshore, however we take reasonable steps to ensure that they will comply with the Privacy Act when collecting, using or handling your personal information.

The types of third parties that we may disclose your information to include, but are not limited to:

- stockbrokers, financial advisers or adviser dealer groups, their service providers and/or any joint holder of an investment;
- those providing services for administering or managing the Fund, including the Investment Manager, Custodian and Administrator, auditors, or those that provide mailing or printing services;
- our other service providers;
- regulatory bodies such as ASIC, ATO, APRA and AUSTRAC; and
- other third parties who you have consented to us disclosing your information to, or to whom we are required or permitted by law to disclose information to.

Equity Trustees or the Investment Manager may from time to time provide you with direct marketing and/or educational material about products and services they believe may be of interest to you. You have the right to "opt out" of such communications by contacting us using the contact details below.

In addition to the above information, Equity Trustees' Privacy Policy contains further information about how we handle your personal information, and how you can access information held about you, seek a correction to that information, or make a privacy-related complaint.

Full details of Equity Trustees' Privacy Policy are available at www.eqt.com.au. You can also request a copy by contacting Equity Trustees' Privacy Officer on +61 3 8623 5000 or by email to privacy@eqt.com.au.

Information on underlying investments

Information regarding the underlying investments of the Fund will be provided to an investor of the Fund on request, to the extent Equity Trustees is satisfied that such information is required to enable the investor to comply with its statutory reporting obligations. This information will be supplied within a reasonable timeframe having regard to these obligations.

12. Glossary of important terms

Administrator

Apex Fund Services Pty Limited will provide administrative and Unit registry services.

Administration Agreement
