Overview

The Coolabah Active Composite Bond Fund (Hedge Fund) is a long duration, daily liquidity, active fixed-income strategy that targets beating the Bloomberg AusBond Composite Bond (0yrs) Index by 1% to 2% p.a. with similar volatility and duration risk.

The fund also targets low tracking error to the index of less than 1% p.a.

The fund is managed by Coolabah Capital Investments, which manages more than \$10 billion with a team of over 47 executives, including 11 portfolio managers and traders, and 15 analysts as at August 2024.

The fund harnesses Coolabah’s highly active investment style to find mispriced bonds that can deliver capital gains in addition to their innate interest or yields. The fund focusses on liquid, investment-grade bonds, with an average credit rating in the A to AA bands, that are tradeable in all environments, including stressed market conditions.

Applying Coolabah’s “quantamental” investment process, the fund has the ability to go both long and short credit risk so that it can profit from credit spreads compressing and/or widening.

The fund cannot invest in hybrid securities, equities, property, unrated securities, high yield bonds or sub-prime loans.

It is a ‘quotable fund’, which allows investors to transact both on Cboe Australia with the ticker **FIXD** or in an unlisted form directly with the Fund Administrator, Apex Fund Services through the APIR Code **ETL2716AU**.
