Overview

The Coolabah Active Composite Bond Fund (Hedge Fund) is a long duration, daily liquidity, active fixed-income strategy that targets beating the Bloomberg AusBond Composite Bond (0yrs) Index by 1% to 2% p.a. with similar volatility and duration risk.

The fund also targets low tracking error to the index of less than 1% p.a.

The fund is managed by Coolabah Capital Investments, which manages more than \$6 billion with a team of over 30 executives, including 8 portfolio managers and 15 analysts as at December 2021. Coolabah was established in 2011 and offers a range of leading short- and long-duration fixed-income strategies.

The fund harnesses Coolabah's highly active investment style to find mispriced bonds that can deliver capital gains in addition to their innate interest or yields.

The fund focusses on liquid, investment-grade bonds, with an average credit rating in the A to AA bands, that are tradeable in all environments, including stressed market conditions.

Applying Coolabah's "quantamental" investment process, the fund has the ability to go both long and short credit risk so that it can profit from credit spreads compressing and/or widening.

The fund cannot invest in hybrid securities, equities, property, unrated securities, high yield bonds or sub-prime loans.

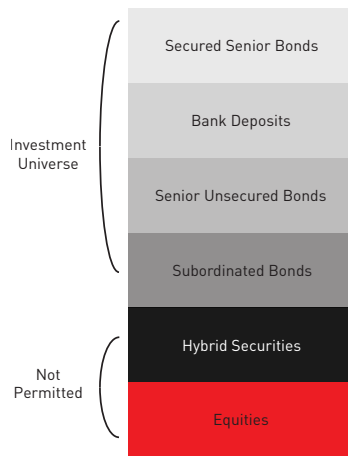

It is a 'quotable fund', which allows investors to transact both on Chi-X with the ticker **FIXD** or in an unlisted form directly with the Fund Administrator, Mainstream Fund Services through the APIR Code **ETL2716AU**.
